Brick 10001483:

Audio Visual Accessories – Replacement Parts

Definition

Includes any products that can be described/observed as replacement parts for Audio–Visual Accessories products.

Excludes products such as Screws or Batteries and all other products catered for in the Audio–Visual Accessories Class.

Brick 10001484:

Audio Visual Accessories Other

Definition

Includes any products that can be described/observed as Audio–Visual Accessories products, where the user of the schema is unable to classify the products in existing bricks within the schema.

Excludes all currently classified Audio–Visual Accessories Products.

Brick 10001482:

Audio Visual Accessories Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Audio–Visual Accessories products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Audio–Visual Accessories class.

Includes products such as Headphones and Microphones sold together.

Items that are received free with purchases should be removed from the classification decision–making process.

Excludes products such as Battery Charger/Discharger and Chargeable Batteries Variety Packs.

Brick 10001478: Audio Visual Bags/Boxes/Cases/Wallets

Definition

Includes any products that can be described/observed as a box, case, bag or wallet that is used to carry and/or store audio–visual equipment.

Includes products such as a CD/DVD box, wallet or record bag.

Excludes products such as Stands, Brackets and CD Racks.

Type of Audio Visual Bag/Case/Wallet (20002644)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of bag/case/wallet used to store and/or transport audio visual equipment.

Attribute Values

Brick 10005747: MP3 Docking Stations

Definition

Includes any products that can be described/observed as a digital music system used in the home, connected to mains electricity, that supports MP3 players with a dock connector and is specifically designed to enhance music stored on an MP3 player. These products may also double as an MP3 charger.

Excludes products such as portable speakers and home speaker systems.

Brick 10001468: Signal Boosters

Definition

Includes any products that can be described/observed as a device used to prevent and/or enhance distorted pictures or sound through the use of long cables or multiple devices.

Excludes products such as Audio and Video cables, Headphones, Wireless Television Links or Converter Cassettes.

Brick 10005809: Sound-active Effect Lighting

Definition

Includes any products that can be described/observed as sound-active lighting that creates multi-dichroic coloured beams which rotate and reflect back and forth in time to the music. The portable product is used by mobile disc jockeys (DJs) and provides colourful lighting action in music clubs.

Excludes products such as fibre optic lighting, fairy lights and portable lanterns.

Brick 10001472: Switch-boxes

Definition

Includes any products that can be described/observed as a box to which several audio/video devices can be connected and then switches are used to select which particular unit to use.

Includes products that can be remotely controlled by a home automation system.

Excludes products such as Splitters, Audio and Video Cables and Wireless TV Links.

Number of Ports (20001215)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the number of ports available through which audio-visual equipment can be attached to the switch-box.

Attribute Values

Brick 10001479:
Television Internet Packs

Definition

Includes any products that can be described/observed as a set of television accessories that enable the internet to be accessed through the television using a browser, set-top box and keyboard.

Excludes products such as Remote Controls and Home Electronics Cables/Leads.

Brick 10001470: Universal Remote Controls

Definition

Includes any products that can be described/observed as an electrical device specifically designed as a remote control for sound and vision appliances through the use of infra-red signals. The controls are useable across multiple brands and types of devices such as televisions and audio systems.

Includes products for intelligent home control that can automate a variety of appliances and controls within a home.

Excludes products such as Switch-boxes or Converter Cassettes.

Type of Universal Remote Control (20001213)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of programming function that a universal remote control has in order to get the infrared code of the devices.

Attribute Values

LEARNING REMOTE CONTROL (30008024)	PRE-PROGRAMMED REMOTE CONTROL (30008025)	PROGRAMMABLE REMOTE CONTROL (30010722) TOUCH SCREEN REMOTE CONTROL (30010723)	UNCLASSIFIED (30002515) UNIDENTIFIED (30002518)

Brick 10005746:
Vibration Absorbers/Dampers

Definition

Includes any products that can be described/observed as a device that prevents the transmission of vibrations and resonances on hifi-components and hifi speakers.

Excludes products such as signal boosters.

Brick 10005735: Visual Distribution Amplifiers

Definition

Includes any products that can be described/observed as an audio visual accessory that enables a single standard or high-definition multimedia interface (HDMI) signal to be displayed on multiple suitably equipped displays (plasma/LCD or projector). The distribution amplifier is 'HD Ready' so high definition satellite or cable boxes and games consoles can be viewed in true HD on all connected displays.

Excludes products such as audio amplifiers, switch-boxes and splitters.

Brick 10001469:

Wireless Television Links

Definition

Includes any products that can be described/observed as a device that transmits signals from one location to another, without the need for any connecting wires.

Excludes products such as Signal Boosters, Switch-boxes and Splitters.

Analog/Digital (20001145)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is analog or digital.

Brick 10001442: Home Audio/Visual Mixers

Definition

Includes any products that can be described/observed as a home audio device that combines audio or visual signals from a number of electrical sources (such as guitars and microphones) and routes them either in mono or stereo to the required destination (such as PA amplifiers or recording equipment). Mixers can be used to individually control the level of each electrical input. The main distinguishing feature of this product is the number of channels it can combine (that is the number of different audio inputs).

Includes desktop mixers.

Excludes products such as CD Players, Vinyl Turntables and Effects Accessories.

Type of Audio Mixer (20001194)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the number of channels in a audio mixer.

Attribute Values

Portable Audio/Video – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as a replacement part or an accessory for Portable Audio/Video products.

Excludes products such as Batteries and Plugs and all other Portable Audio/Video Products currently catered for within the Portable Audio class, as well as Recording Media products such as Blank Audio/Video Cassettes.

Brick 10001428:

Portable Audio/Video Other

Definition

Includes any products that can be described/observed as Portable Audio/Video products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Portable Audio Products as well as Audio–Visual Accessories such as Headphones.

Brick 10001426: Portable Audio/Video Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Portable Audio/Video products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Portable Audio/Video class.

Includes products such as Portable DVD Players and MP3 Players sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Dictation Machine and Blank Audio Cassette Variety Packs.

Brick 10001416: Portable CD Players

Definition

Includes any products that can be described/observed as portable devices that playback CDs.

Excludes products such as portable MD, MP3 and Cassette Players as well Home Audio and Car Audio CD Players.

If MP3 Playback Capability (20001156)

Brick 10001404:
Televisions – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as replacement parts or accessories for Televisions.

Excludes products such as Batteries and Plugs and all other Television products currently catered for within the Televisions class.

Brick 10001405: Televisions Other

Definition

Includes any products that can be described/observed as Televisions, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Television products as well as products such as Aerials and Remote Controls which can be found in the Video Recording/Playback/Receiving class.

Brick 10001403: Televisions Variety Packs

Definition

Includes any products that can be described/observed as two or more Television products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Televisions class.

Includes products such as Televisions and Hand-held Televisions sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Television and Surround Sound Speakers Variety Packs.

Brick 10001411:

Aerials

Definition

Includes any products that can be described/observed as a device that is used for receiving television or radio signals.

Includes a variety of radio antennas as well as television aerials that can either be connected by cable from the television to an external aerial, or be a portable plug-in aerial that is normally placed on top of the television.

Excludes products such as Set-top Boxes, Camcorders and any DVD or Video Players/Recorders.

Analog/Digital (20001145)

Brick 10005841: Audio/Visual Receivers

Definition

Includes any products that can be described/observed as a consumer electronics component typically found within a home theatre system. Their primary purpose is to amplify sound from a multitude of possible audio sources as well as route video signals to a TV from various sources. The user may program and configure a unit to take inputs from devices such as DVD players and video recorders, and can select which source to route to the TV and have sound output. Includes products that offer specialised Digital Signal Processors (DSP) made for handling various presets and audio effects.

Excludes products such as set-top boxes and aerials as well as complete theatre systems that include A/V receivers.

If With Remote Control (20000651)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product comes with a remote control device.

Attribute Values

NO (30002960)

Brick 10005736:

Low-noise Block (LNB) Converters

Definition

Includes any products that can be described/observed as an electronic converter that is usually fixed on or in a satellite dish. The LNB uses special electronic engineering techniques of amplification and mixing before cable attenuation. The block is free of additional electronics like a power supply or a digital receiver and this results in a signal which has less noise and unwanted signals.

Excludes products such as aerials and set-top boxes.

Brick 10005760: Satellite Reception Accessories

Definition

Includes any products that can be described/observed as an accessory or aid to improving satellite reception.

Includes products such as satellite inline amplifiers and aerial resistors.

Excludes products such as satellite installation accessories.

Type of Satellite Reception Accessory (20002662)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of accessory used to improve satellite reception.

Brick 10005739: Video Receiving/Installation Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Video Receiving/Installation products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack, which cross bricks within the Video Receiving/Installation class.

Includes products such as satellite aerials and mast clamps sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as satellite aerial and television variety packs.

Brick 10005808: Audiograms

Definition

Includes any products that can be described/observed as an audio interface system that can transform any USB equipped computer into a complete and comprehensive recording studio.

Includes products which can also deliver a wide range of simple solutions for recording performances and producing audio CD's for the growing number of musicians and Podcasters using the internet as a way to market their material.

Excludes all other classified audio recorders.

Brick 10001406: Camcorders

Definition

Includes any products that can be described/observed as a handheld television camera specifically designed to capture or record moving images and sound onto a video cassette, DVD or electronic memory, and typically intended for domestic or recreational purposes.

Excludes products such as DVD Players/Recorders, Video Players/Recorders and Video Hard Disc Recorders.

Camcorder Recording Medium (20001151)

Brick 10006245: Graphics – Digital

Definition

Includes any products that can be described / observed as a graphic which is downloaded or streamed to a reader. They are typically intended for use in conjunction with a smart phone or computer including tablet computers. Includes content that is a photograph, drawing, cartoon, logo, picture, or computer / mobile phone wall paper.

Excludes products such as books printed on paper, Audio Books, Fonts, Digital Periodical Content, eBooks Digital Movie and TV Show.

Brick 10006241: Movies – Digital

Definition

Includes any products that can be described / observed as a movie which is downloaded or streamed to a video playing device. They are typically intended for use in conjunction with a television, MP3 player, smart phone, or computer. Includes movies and movie trailers.

Specifically excludes audio books, music videos, pre-recorded CDs, DVDs and television shows.

Brick 10006239:

Music – Digital

Definition

Includes any products that can be described / observed as music which is downloaded or streamed to a audio playing device. They are typically intended for use in conjunction with an MP3 player, smart phone, or computer. Includes digital music video content which may have a video component but whose primary focus is a song or songs.

Excludes ring tones, non-music audio digital content, audio books, and physical trade items such as pre-recorded CDs, DVDs, audio cassettes, and vinyl records.

Brick 10001466: Pre-recorded Media Other

Definition

Includes any products that can be described/observed as Pre-Recorded Media products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Specifically *excludes gaming software*.

Excludes all currently classified Pre-Recorded Media products as well as Computer Software CDs or Discs to be found within Computers. Also excludes digital products that are downloaded or streamed to customer.

Brick 10001465: Pre-recorded Media Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Pre-Recorded Media products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Pre-Recorded Media class.

Includes products such as Pre-recorded Audio Cassettes and Pre-recorded DVDs sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Fitness DVD and Exercise Mat Variety Packs. Also excludes digital products that are downloaded or streamed to customer.

Brick 10006243:
Ring Tones – Digital

Definition

Includes any products that can be described / observed as digital audio content which is downloaded or streamed to a mobile / cell phone to alert the user to an incoming phone call, text message, alarm clock, etc.

Brick 10006244:
Television Shows – Digital

Definition

Includes any products that can be described / observed as a television show which is downloaded or streamed to a video playing device. They are typically intended for use in conjunction with a television, MP3 player, smart phone, or computer. Includes TV shows in whole or part or a specific series of TV shows.

Excludes audio books, pre-recorded CDs or DVDs and electronic / digital music and movies.

Brick 10006242:

Video (Non-Movies) – Digital

Definition

Includes any products that can be described / observed as digital video content which is downloaded or streamed to a video playing device. They are typically intended for use in conjunction with a television, MP3 player, smart phone, or computer. Includes videos that may be instructional, inspirational, or those demonstrating exercise or DIY techniques.

Specifically excludes audio books, music videos, movies, movie trailers, pre-recorded CDs, DVDs and television shows.

Brick 10001463: Video Cassettes – Pre-recorded

Definition

Includes any products that can be described/observed as a pre-recorded video cassette consisting of a plastic case containing magnetic tape. They are specifically designed to store and replay recorded visual information and are typically intended for use in conjunction with a video cassette player.

Includes products such as films and television shows recorded on to Video Cassettes.

Excludes products such as Pre-Recorded CDs, Cassettes, DVDs, MDs and Vinyl Records, as well as Recordable Video Cassettes. Also excludes digital products that are downloaded or streamed to customer.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

Brick 10001532: Car Audio Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Car Audio products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Car Audio class.

Includes products such as Car Audio CD Players and Car Speakers sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Car Audio CD Player/Changer and CD Lens Cleaner Variety Packs.

Brick 10006403:
Automotive GPS Mounts and Cradles

Definition

Includes any items used together with a handheld or Automotive/Marine GSP unit as a mount or cradle.

Brick 10001519: Car DVD Players

Definition

Includes any products that can be described/observed as a device specifically designed for use in the car to display/play the contents of a pre-recorded DVD onto a television or screen.

Excludes products such as Car Video Monitors and Car VCR Players/Recorders.

If With Remote Control (20000651)

Brick 10005749:
Car GPS Antennae

Definition

Includes any products that can be described/observed as a car antenna for satellite navigation. It may be used both inside and outside the automobile.

Excludes products such as car audio aerials and car video receiving equipment.

Brick 10001517:

Car Navigation Equipment

Definition

Includes any products that can be described/observed as a car audio visual system that uses a combination of information received from several Global Positioning System (GPS) satellites, an internal gyroscope and connections to the Vehicle Speed Sensor (VSS) to navigate the car. The system is capable of planning the optimum route and guiding the driver with audible instructions, including warnings of traffic congestion and accident black spots.

Includes integrated and portable systems.

Excludes products such as Car Video Monitors or Car Video Receiving Equipment and mobile GPS tracking equipment classified in Communications.

If Integrated (20002641)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the system is installed on the control panel of the car.

Attribute Values

Magnifying Glasses

Definition

Includes any products that can be described/observed as a portable, curved, single-lensed optical instrument, specifically designed to magnify vision, and typically intended to provide the user with an enhanced image of near objects and print.

Excludes products such as Binoculars, Monoculars, Telescopes and Microscopes.

Brick 10001502: Microscopes

Definition

Includes any products that can be described/observed as a multi-lens optical instrument designed to magnify vision and provide the user with a highly enhanced image of very small objects, which are often not visible to the naked eye. In order to view the objects, they need to be mounted on a prepared slide, which is placed under the lenses.

These products typically have a scientific application.

Excludes products such as Binoculars, Magnifying Glasses, Monoculars and Telescopes.

Brick 10001501: Monoculars/Telescopes

Definition

Includes any products that can be described/observed as a cylindrical device containing a system of lenses and mirrors that collect and focus light to produce an image. They are specifically designed to magnify vision and intended to provide the user with an enhanced image of very distant objects. The image is viewed by one eye only.

Products include hand held monoculars and astronomical telescopes mounted on tripods.

Excludes products such as Binoculars, Magnifying Glasses, Microscopes.

Brick 10001505:
Optics – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as a replacement part or an accessory for products within the Optics class.

Excludes products such as Batteries and all Optics Products currently catered for in the Optics class.

Brick 10001506: Optics Other

Definition

Includes any products that can be described/observed as Optics products, where the user of the schema is not able to classify the products in any existing bricks within the schema.

Excludes all currently classified Optics products as well as Interchangeable Lenses to be found in the photography class.

Brick 10001504: Optics Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Optics products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Optics class.

Includes products such as Binoculars and Magnifying Glasses sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Telescope and Astrology Chart Variety Packs.

Brick 10001486: Analogue Cameras

Definition

Includes any products that can be described/observed as an analogue device specifically designed to produce a permanent image of a person, location or event. Typically it is composed of a lens system contained within a lightproof box or compartment containing a light sensitive film that is positioned behind a shutter, so that when the shutter is opened/released an image is captured upon the film. The film is replaceable and can be exchanged for a new one once all the film has been exposed.

Excludes products such as Digital Cameras or Disposable Cameras.

Brick 10001493: Photographic Slides

Definition

Includes any products that can be described/observed as a small piece of photographic film in a frame which, when light is passed through it, shows a larger image on a screen or plain surface.

Excludes products such as Slide Projectors or Films.

If Glass (20001230)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is made from glass.

Attribute Values

NO (30002960)

UNIDENTIFIED (30002518)

YES (30002654)

Brick 10005751: Photographic Slides – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as a replacement part or an accessory used when putting together photographic slides.

Includes products such as a slide cutter or slide frame.

Excludes products such as toy viewers and slide projectors.

Type of Photographic Slide – Replacement Part/Accessory (20002653)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of replacement part or accessory used when putting together photographic slides.

Brick 10005753: Photographic Studio Flash Gun

Definition

Includes any products that can be described/observed as a dry-cell powered photographic apparatus, not incorporated in a camera, that holds and electrically triggers a flashbulb simultaneously with the opening of a camera shutter. The effect is to provide momentary light while taking a photograph in a photographic studio.

Excludes products such as cameras with incorporated flashes, photography lights and light reflectors and diffusers.

Brick 10001494: Photography – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as a replacement part or an accessory used when taking a photograph with a camera.

Includes products such as Cases, Cleaning Equipment, Tripods, Meters and Lights

Excludes products such as Interchangeable Lenses, Camera Flashes and Safelights.

Type of Photography Replacement Part/Accessory (20001231)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of photography replacement part or accessory.

Brick 10001498: Photography Other

Definition

Includes any products that can be described/observed as Photography products, where the user of the schema is not able to classify the products in any existing bricks within the schema.

Excludes all currently classified Photography products as well as products such as Photographic Paper and Developing Photo Chemicals to be found in the Photography Studio/Dark Room Equipment class.

Brick 10001496: Photography Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Photography products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack, which cross bricks within the Photography class.

Includes products such as Disposable Cameras and Photograph Albums sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Slide Projector and White Screen Variety Packs.

Brick 10001507: Photograph Developing Chemicals

Definition

Includes any products that can be described/observed as chemicals used in the process of developing film into photographs.

Excludes products such as Photographic Paper and Photography Drying Equipment.

Type of Photograph Developing Chemical (20001236)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of photograph developing chemical.

Brick 10001512: Photography Dark Room Safelights

Definition

Includes any products that can be described/observed as a lamp used in an enclosed darkroom where photographic film is developed. The lamp is fitted with a filter to screen out light rays to which film and paper are sensitive.

Excludes products such as Enlargers or Reflectors/Diffusers/Backgrounds.

Brick 10001513: Photography Dark Room Tanks/Trays/Reels

Definition

Includes any products that can be described/observed as tanks, trays or reels used in dark rooms to aid the processing of photographic films.

Excludes products such as Enlargers, and Photography Drying Equipment.

Type of Tank/Tray/Reel (20001241)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of photography dark room tank, tray or reel.

Attribute Values
