

Brick 10005387: Environmental Fire/Chemical Safety Products Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct combinations of environmental fire or chemical safety products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Environmental Fire/Chemical Safety Products class.

Includes products such as a fire chute sold with a smoke hood.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as fire retardant and fire extinguisher variety packs.

Brick 10005384: Fire Escape Chutes/Ladders

Definition

Includes any products that can be described/observed either as a sloping or vertical channel down which people and possessions can slide to escape a fire, or as a set of rungs used as a means of climbing down from a window of a building on fire. These products come with flame resistant, tangle free deployment mechanisms to enable rapid release in the case of emergencies.

Excludes products such as ladders used in general DIY.

Type of Fire Escape Chute/Ladder (20002314)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of fire escape chute or ladder.

Attribute Values

FIRE ESCAPE CHUTE
(30012024)

FIRE ESCAPE LADDER
(30012025)

UNCLASSIFIED (30002515)
UNIDENTIFIED (30002518)

Brick 10005383: Fire Retardants/Suppressants

Definition

Includes any products that can be described/observed as a treatment that either retards a fire by reacting with the fuel to stop combustion, or suppresses the fire through asphyxiation causing lack of oxygen.

Includes products such as fire retardant fabric treatments, fire retardant resins and water-based foams.

Excludes products such as fire blankets and fire extinguishers.

Type of Fire Retardant/Suppressant (20002313)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of fire retardant or fire suppressant.

Attribute Values

FIRE RETARDANT FABRIC
TREATMENT (30012021)

FIRE RETARDANT RESIN
(30012022)

FIRE SUPPRESSANT FOAM
(30012023)

UNCLASSIFIED (30002515)
UNIDENTIFIED (30002518)

Brick 10005385: Public Fire Alarms

Definition

Includes any products that can be described/observed as a device that emits a piercing sound, warning the public of a fire hazard.

Includes products such as a bell, horn or siren.

Excludes products such as burglar alarms and home smoke detectors.

Type of Public Fire Alarm (20002315)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of public fire alarm.

Attribute Values

FIRE ALARM BELL (30012026)	FIRE ALARM HORN (30012027)	FIRE ALARM SIREN (30012028)	UNCLASSIFIED (30002515) UNIDENTIFIED (30002518)
-------------------------------	-------------------------------	--------------------------------	--

Brick 10005386: Smoke Hoods/Respirators

Definition

Includes any products that can be described/observed as a device that protects the head and respiratory system from toxic smoke. These products combine heat resistant properties with filtration functions.

Excludes products such as DIY respirators, gas masks and face shields.

If With Attached Respirator (20002316)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product has an incorporated respirator.

Attribute Values

NO (30002960)

UNIDENTIFIED (30002518)

YES (30002654)

Brick 10005388: Air/Fog Horns

Definition

Includes any products that can be described/observed as a portable air siren that can be heard at a distance over water. These products are used by boating and sailing enthusiasts to warn other shipping in the event of bad and foggy weather.

Excludes products such as personal alarms and fire alarms.

If Portable (20000805)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product claims to be portable.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

If Rechargeable (20002311)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product can be recharged.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

Brick 10005725: Barricade Safety Tapes

Definition

Includes any products that can be described/observed as a robust plastic tape used to cordon off or barricade a potentially hazardous area. The tapes come in different colours, may be printed with cautionary words and some are reflective so that they can be seen in the dark.

Excludes products such as public safety crowd barriers.

If Printed (20002627)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product is printed.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

If Reflective (20002626)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product has reflective properties.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

Brick 10005389:

Lifebelts/Life-Jackets/Lifesuits

Definition

Includes any products that can be described/observed as a personal flotation device, which is worn by an individual and is made of buoyant or inflatable material to support a person's body in water. Products may be automatically or manually inflated and may be supplied with a 'd ring' for attaching to a lifeline.

Includes products such as a flotation collar which keeps the head above water, a vest or jacket, or a buoyant full wet suit, all made in a wide range of sizes from baby to adult.

Excludes products such as liferafts and flotation cushions, general purpose protective clothing and pet lifejackets.

Automatic/Manual Inflation (20002318)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is automatically or manually inflated.

Attribute Values

AUTOMATIC INFLATION
(30012032)

MANUAL INFLATION
(30012033)

UNIDENTIFIED (30002518)

Type of Lifebelt/Life-Jacket/Lifesuit (20002317)

Attribute Definition

Brick 10005390:
Liferafts/Life-Buoys/Flotation Cushions

Definition

Includes any products that can be described/observed as a buoyant platform or prop designed to keep people afloat and prevent them from drowning. A liferaft can be designed to accommodate one person or many and may be equipped with boarding ladders, a canopy and locator lights. A lifebuoy is usually ring-shaped or horseshoe-shaped and has a connecting line allowing the casualty to be pulled to the rescuer. A flotation cushion, upon which a body can float, is simply a cushion made of flotation foam covered in a waterproof material and has straps to enable rescue.

Excludes products such as lifebelts and lifejackets.

Type of Liferaft/Life-Buoy/Flotation Cushion (20002319)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of liferaft, lifebuoy or flotation cushion.

Attribute Values

FLOTATION CUSHION

Brick 10005872:

Marine Electronic Chartplotters

Definition

Includes any products that can be described/observed as a device used in marine navigation that integrates GPS data with an electronic navigational chart to compute an accurate position of the vessel. These marine electronics devices are continuously evolving with larger screens, increased processing power, and multi-function capabilities that allow them to display data from a connected radar, fish finder, weather receiver, or be coupled to another marine chartplotter via a marine network.

Excludes products such as transponders, navigation radar equipment, navigation software and mobile GPS equipment used on land.

Brick 10005873:

Marine Navigation Software

Definition

Includes any products that can be described/observed as a computer-based navigation information system that complies with International Maritime Organization (IMO) regulations and can be used as an alternative to paper navigation charts. The system displays the information from electronic navigational charts and integrates position information from the Global Positioning System (GPS) and other navigational sensors, such as radar and automatic identification systems. It may also display additional navigation-related information, such as sailing directions and fathometer.

Excludes products such as transponders, chartplotters, radar systems and mobile GPS equipment used on land.

Brick 10005874:
Marine Navigation Radar Systems

Definition

Includes any products that can be described/observed as a system that provides navigation information when the vessel is within radar range of land or special radar aids. Distances and angular bearings are used to establish arcs of position and lines of position on a navigation chart.

Excludes products such as transponders, chartplotters, navigation software and mobile GPS equipment used on land.

Brick 10005474: Rock Salt/Ice Melting Products

Definition

Includes any products that can be described/observed as a chemical that causes ice to melt on paths and roadways.

Includes products such as sodium chloride known as rock salt and calcium chloride.

Excludes products such as liquid window de-icer and anti-freeze used in the automotive industry.

Brick 10005392:

Sandbags/Flood-guards

Definition

Includes any products that can be described/observed as either a large bag that can be filled with sand or earth, or an interlocking panelled barrier, both of which are used as a barricade against flood-water.

Excludes products such as garden refuse bags and garden fencing.

Type of Material (20000794)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

Brick 10005394: Transponders

Definition

Includes any products that can be described/observed as a wireless communications, monitoring or control device that picks up and automatically responds to an incoming signal. These devices are employed in location, identification and navigation systems especially assisting in air/sea ship or survival craft rescue operations.

Excludes products such as GPS equipment, chartplotters, radar systems and navigation software.

If Waterproof (20000658)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify if the product is waterproof.

Attribute Values

Access Control Security Systems

Definition

Includes any products that can be described/observed as an electronic system situated at the entry door or gate of a property that identifies the person through the use of a security code, business related personnel information or personal recognition factors such as a fingerprint or the iris of the eye.

Includes products such as keypad entry that requires a security code, swipe card control that incorporates personnel information and biometric scan-in access control that recognises fingerprints.

Excludes products such as door intercoms, door viewers and computer access security control systems.

Type of Access Control Security System (20002328)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of access control that is incorporated in the security system.

Attribute Values

Brick 10005399: Door/Gate Entry Intercoms

Definition

Includes any products that can be described/observed as an electronic audio communication system situated at the entry door or gate of a property. The system allows two-way verbal communication between the caller outside and the occupant inside and is a safety measure to prevent unwanted callers or intruders.

Includes products such as corded and cordless sets as well as systems with automatic answering and door unlocking facilities.

Excludes products such as intra-home or intra-company intercoms which provide two-way communication between rooms, as classified in the Communications segment.

Corded/Cordless (20001116)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is connected to a base unit or power supply by a cord.

Attribute Values

CORDED (30007714)

CORDLESS (30007715)

UNIDENTIFIED (30002518)

Brick 10005402: Door/Gate Viewers

Definition

Includes any products that can be described/observed as an optical device that is mounted into the entrance door of a home or building so that one can see an outside visitor before opening the door.

Includes products that require the eye to be placed on the viewer and products that can provide a view when the observer is at a short distance from the door.

Excludes products such as surveillance cameras and video recorders.

Type of Material (20000794)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

Door/Window/Perimeter Security Products Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct combinations of door/window/perimeter security products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Door/Window/Perimeter Security Products class.

Includes products such as a security door sold with a door intercom.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as security door and burglar alarm variety packs.

Brick 10005403: Security Doors/Gates

Definition

Includes any products that can be described/observed as a secure door or gate made of a robust material that prevents penetration through a doorway of a premises, building or room.

Includes products such as reinforced steel entrance doors, fire resistant internal doors, roller shutter doors, concertina gates, steel grille doors and perimeter security gates.

Excludes products such as standard or decorative doors and gates that are not intended for security purposes.

External/Internal (20002331)

Brick 10005410: Home/Business Fire Extinguishers Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct combinations of home/business fire extinguisher products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Home/Business Fire Extinguishers class.

Includes products such as a fire blanket sold with a pressurised fire extinguisher.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as fire hose and fire chute variety packs.

Brick 10005417:

Home/Business Safety/Security/Surveillance Variety Packs

Definition

Includes any products than can be described/observed as two or more distinct home or business safety/security/surveillance products sold together which exist within the schema but belong to different classes that is two or more products contained within the same pack which cross classes within the Home/Business Safety/Security/Surveillance family.

Includes products such as burglar alarm and security lights variety packs.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as fire retardant and fire blanket variety packs.

Brick 10005411: Bugging/Debugging Equipment

Definition

Includes any products that can be described/observed as, in the case of bugging equipment, a small hidden microphone and/or camera that secretly monitors conversation and activity from a distance and in the case of debugging equipment, a detecting/protecting/scrambling device that provides an effective countermeasure to bugging.

Includes products such as wireless cameras and receivers that can be disguised as pens and credit cards, as well as camera detectors, phone protectors and portable scramblers.

Excludes products such as visible, conspicuous surveillance cameras and video recorders that are used as a security measure within and outside a building.

Type of Bugging/Debugging Equipment (20002341)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of bugging or debugging equipment.

Brick 10005376: Personal Luggage Alarms

Definition

Includes any products that can be described/observed as a personal security device for bags, suitcases and luggage in general.

Includes simple alarms that look like luggage tags, which are touch sensitive and sound a piercing alarm when activated. Also includes devices that consist of a transmitter and signal receiver, which can be activated at a distance thus enabling scrutiny when luggage may be out of sight.

Excludes products such as key ring alarms.

If With Remote Control (20000651)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product comes with a remote control device.

Attribute Values

NO (30002960)

UNIDENTIFIED (30002518)

YES (30002654)

Brick 10005382: Personal Safety Devices Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct combinations of personal safety products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Personal Safety Devices class.

Includes products such as a personal safety flare sold with a personal safety light.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as personal safety flare and life jacket variety packs.

Brick 10005378:

Personal Safety Lights

Definition

Includes any products that can be described/observed as a portable light that emits a powerful beam and can be used to disconcert a would be attacker or as a distress signal that pinpoints an individual's position or location.

Includes products that have a strobe capability and some lights may be combined with an air horn.

Excludes products such as safety flares, air horns with no in-built safety light and torches and flashlights classified in the Electrical Supplies sector.

If Stroboscope (20002308)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product functions as a stroboscope, producing a rapidly flashing bright light.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)
