

Brick 10001117: Computer Casing/Housing

Definition

Includes any products that can be described/observed as a plastic box specifically designed to hold a Central Processing Unit (CPU) or Uninterruptible Power Supply (UPS).

Includes products such as Casing/Housing used to enhance or change the appearance of a Computer.

Excludes products such as Computer Bags, Anti-Static Covers and Carriers.

Type of Computer Casing/Housing (20001023)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of computer casing or housing.

Attribute Values

CENTRAL PROCESSING

Brick 10001118:

Computer Components – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as replacement parts and accessories that can be applied to various computer components.

Excludes all other products currently catered for within Computers segment.

Brick 10001119: Computer Components Other

Definition

Includes any products that can be described/observed as a Computer Component, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computer Components.

Brick 10001120: Computer Components Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Computer Component products sold together which exist within the schema but belong to different bricks, that is two or more products contained within the same pack which cross bricks within the Computer Components class.

Includes products such as Computer Memory and Computer Motherboards sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Computer Processors sold individually.

Brick 10001121:

Computer Cooling

Definition

Includes any products that can be described/observed as a device for cooling computer equipment, including products that create a current of air or a breeze for cooling.

Excludes any products not specifically designed for Computers.

Target Use/Application (20001709)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the target use and/or application.

Attribute Values

--	---	---	-------------------------

Brick 10001122:

Computer Memory

Definition

Includes any products that can be described/observed as an integrated circuit memory chip, which can be used by programs to perform necessary tasks while the computer is on or which allows information to be stored or accessed. This information can be stored or accessed in any order and all storage locations are equally accessible.

Excludes products such as Data Storage Devices.

Target Use/Application (20001709)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the target use and/or application.

Brick 10001123:

Computer Motherboards

Definition

Includes any products that can be described/observed as the primary printed circuit board in a PC, which contains all of the basic circuitry and components required for a PC to function.

The motherboard typically contains the system bus, processor and coprocessor sockets, memory sockets, serial and parallel ports, expansion slots and peripheral controllers but can be sold with or without these components attached.

Excludes products such as Peripherals.

Target Use/Application (20001709)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the target use and/or application.

Brick 10005683: Computer/Video Games Mass Storage

Definition

Includes any products that can be described/observed as a mass storage device on which data is held and from which data can be retrieved. Includes devices such as tapes, cartridges and disks specifically for use with computers and video consoles.

Includes products such as ZIP and JAZZ disks.

Excludes products such as random access memory (RAM).

Storage Medium/Device (20002579)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of device used for storage.

Attribute Values

DATA CARTRIDGE/TAPE

Brick 10001126: Expansion Boards/Cards

Definition

Includes any products that can be described/observed as a printed circuit board that can be inserted into an expansion slot of a computer in order to add additional graphic and/or sound functionality so that one can view TV or play music on the computer.

Includes products such as a graphics expansion card, a sound card and a TV card.

Excludes products such as memory cards and storage medium such as data cartridges.

Type of Expansion Board/Card (20001032)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of expansion board or card.

Attribute Values

Brick 10001129:
Computer Drives – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as replacement parts and accessories that can be applied to various computer drives.

Excludes all other products currently catered for within Computers segment.

Brick 10001130: Computer Drives Other

Definition

Includes any products that can be described/observed as a Computer Drive, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computer Drives.

Brick 10001131: Computer Drives Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Computer Drive products sold together which exist within the schema but belong to different bricks, that is two or more products contained within the same pack which cross bricks within the Computer Drives class.

Includes products such as Floppy Disc Drives and CD Drives sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Hard Disc Drives sold individually.

Brick 10001132: Floppy Disc Drives

Definition

Includes any products that can be described/observed as a drive that can read and write onto floppy discs.

Excludes products such as CD and DVD Drives and Hard Drives.

Integrated/External (20002018)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is integrated within a main unit or external to it.

Attribute Values

EXTERNAL (30007610)

INTEGRATED (30007248)

UNIDENTIFIED (30002518)

Brick 10001133: Hard Disc Drives

Definition

Includes any products that can be described/observed as a storage device that uses a set of rotating, magnetically coated discs called platters to store data or programs, hermetically sealed to prevent airborne contaminants from entering and interfering with these close tolerances.

Excludes products such as Floppy Disc Drives and CD/DVD Drives.

If Multimedia (20002710)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product uses a combination of text, audio, still images, animation, and video.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

If Solid State Disc (20002643)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is a solid state disc.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

If With Network Connection (20002715)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product has network connection.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

Brick 10001134: Swap Drives

Definition

Includes any products that can be described/observed as a peripheral data storage device, which can enable a computer to process data and execute programs requiring a greater amount of storage than that which is available in the main memory. Once the main memory is full the excess data remains on the storage device but is exchanged with data on the main memory when the operating system requires the data in order to execute a specific program or function.

Excludes products such as Hard Disc Drives, Floppy Disc Drives and peripheral devices not specifically designed for use with Computers.

Integrated/External (20002018)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is integrated within a main unit or external to it.

Brick 10001172:

Computer Networking Equipment – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as replacement parts and accessories that can be applied to various Computer Networking Equipment.

Excludes all other products currently catered for within Computers segment.

Brick 10001170: Computer Networking Equipment Other

Definition

Includes any products that can be described/observed as Computer Network Equipment, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computer Network Equipment.

Brick 10001171: Computer Networking Equipment Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Computer Networking Equipment products sold together which exist within the schema but belong to different bricks, that is two or more products contained within the same pack which cross bricks within the Computer Networking Equipment class.

Includes products such as Computer Firewalls and Gateways sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Network Access Points sold individually.

Brick 10001162:

Firewalls

Definition

Includes any products that can be described/observed as a set of related programmes, located at a network gateway server, which protects the resources of a private network from users from other networks.

Excludes any other Computer Programmes.

Brick 10001163:

Gateways

Definition

Includes any products that can be described/observed as a device that enables two dissimilar systems that have similar functions to communicate with each other.

Excludes products such as Switches, Hubs, Routers and Firewalls.

Brick 10001164:

Modems

Definition

Includes any products that can be described/observed as a device that transmits and receives encoded digital data via telephone lines, converting digital signals to analogue signals and vice versa. Includes both internal and external modems.

Products include Computer Modems, Laptop Modems and Personal Digital Assistants Modems.

Excludes products such as Telephones.

Integrated/External (20002018)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is integrated within a main unit or external to it.

Brick 10001112:
Computer Tools/Tool Kits

Definition

Includes any products that can be described/observed as a collection of tools specifically designed to be used with computer equipment.

Excludes products such as DIY Toolkits.

Brick 10001362:
Computer/Video Game Accessories Other

Definition

Includes any products that can be described/observed as Computer/Video Games Accessories, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computer/Video Game Accessories, Peripherals and Components.

Brick 10001363: Computer/Video Game Accessories Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Computer/Video Game Accessories products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Computer/Video Game Accessories class.

Includes products such as a Computer Mat and Computer Rest sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Computer Tool Kits and Computer variety packs.

Brick 10001107: Computer/Video Game Cases/Carriers

Definition

Includes any products that can be described/observed as a container or receptacle specifically designed to hold or carry computer and video game console products.

Excludes products such as Bags and Briefcases classified in Personal Accessories and any Photographic Equipment Carriers.

Type of Computer/Video Game Case/Carrier (20001011)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of computer or video game console case or carrier.

Computer/Video Game Control/Input Devices – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as replacement parts and accessories that can be applied to various Computer/Video Game Console Control and Input Devices.

Excludes products classified in other bricks of Computer/Video Game Console Control and Input Devices class.

Brick 10001364:
Computer/Video Game Control/Input Devices Other

Definition

Includes any products that can be described/observed as Computer/Video Game Control and Input Devices, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computer/Video Game Console Control and Input Devices.

Brick 10001365:

Computer/Video Game Control/Input Devices Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Computer/Video Game Control and Input Device products sold together which exist within the schema but belong to different bricks, that is two or more products contained within the same pack which cross bricks within the Computer/Video Game Control and Input Devices class.

Includes products such as Computer Keyboards and Mice sold together.

Items that are received free with purchases should be removed from the decision-making process.

Excludes products such as Computer Keyboards sold individually.

Brick 10005686:

Digital Pens

Definition

Includes any products that can be described/observed as a pen that is used for transmitting handwritings or pictures to a computer, mobile phone or other computing device. A tiny camera next to the nib of the pen takes continual pictures when writing, this information is then stored in the pen for downloading at a later time.

Includes products that use bluetooth for transmitting/downloading information.

Specifically excludes non-digital stationery pens.

Excludes products such as Computer Pointing Devices, Computer Graphics Tablets and Personal Data Assistant/Organiser Styluses.

If with Bluetooth (20002582)

Brick 10006235:
Computer/Video Game Gaming Software – Digital

Definition

Includes any products that can be described / observed as digital game content designed to provide activity for entertainment or amusement which is downloaded or streamed. They are typically intended for use in conjunction with a gaming console and/or a television or computer and may be a new game, an update to an existing game or a small portion of a game such as a new character, map or level. Includes traditional video games, sports games such as golf, DIY instructions and exercising.

Excludes Non-Game Software, Digital Mobile Apps, Game Software on Pre-recorded CD's or DVD's.

Brick 10001139:
Computer/Video Game Software Other

Definition

Includes any products that can be described/observed as Computer/Video Game Software, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computer/Video Game Software.

Brick 10001140: Computer/Video Game Software Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Computer/Video Game Software products sold together which exist within the schema but belong to different bricks, that is two or more products contained within the same pack which cross bricks within the Computer/Video Game Software class.

Includes products such as Computer Educational and Games software sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Computers/Video Games sold individually.

Brick 10001141:
Computers – Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as replacement parts and accessories that can be applied to various computer products.

Excludes all other products currently catered for within the Computers/Video Games segment.

Brick 10001142: Computers Other

Definition

Includes any products that can be described/observed as a Computer article, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Computers as well as articles to be found within the Communication segment.

Brick 10001143: Electronic Organisers

Definition

Includes any products that can be described/observed as a portable computing device like databases, organisers, dictionaries or translators that have no open (programmable) operating system.

Excludes products such as portable Personal Computers, Mobile Devices, and Personal Digital Assistants.

Type of Electronic Assistant (20001051)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of electronic assistant.
