

Brick 10000838: Barrier Contraception Other

Definition

Includes any products that can be described/observed as Barrier Contraception products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Hormonal Contraception and Intra-Uterine Contraception products and Barrier Contraception obtained only by prescription or from a healthcare professional

Brick 10000674: Barrier Contraception Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Barrier Contraception products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Barrier Contraception class.

Includes products such as Diaphragms and Spermicides sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Diaphragms and Ovulation Tests variety packs and Barrier Contraception variety packs obtained only by prescription or from a healthcare professional.

Brick 10000460: Condoms

Definition

Includes any products that can be described/observed as a thin latex sheath that is either worn by males or used by a female during sexual activity, to prevent conception and sexually transmitted diseases.

These products are available with or without spermicide or lubricant and can be flavoured.

Excludes products such as Contraceptive Spermicides, Diaphragms, Sponges Cervical Caps and Condoms obtained only by perscription or from a healthcare professional..

Condom Gender Type (20000529)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the condom is aimed at males or females.

Brick 10000920:
Respiratory/Allergy Products Other

Definition

Includes any products that can be described/observed as Respiratory/Allergy products, where the user of the schema is not able to classify the product in existing bricks within the schema.

Excludes all currently classified Respiratory/Allergy products, Flower/Homeopathic remedies for respiratory and allergy problems and Respiratory/Allergy Products obtained only by prescription or from a healthcare professional.

Brick 1000884: Respiratory/Allergy Products Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Respiratory/Allergy Products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Respiratory/Allergy Products class.

Includes products such as Cough Remedies and Hay Fever Relief sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Cough Remedies and Vitamin variety packs and Respiratory/Allergy Products variety packs obtained only by prescription or from a healthcare professional.

Brick 10000880: Throat Remedies

Definition

Includes any products that can be described/observed as a preparation intended to soothe or provide relief from the symptoms of a sore or infected throat.

Includes products such as Liquid Remedies, Soluble Powder Remedies, Tablet Remedies and Spray Remedies.

Excludes products such as Throat Remedies obtained only by prescription or from a healthcare professional and any remedy not specifically intended for the throat.

Brick 10000525: Ear Preparations

Definition

Includes any products that can be described/observed as a healthcare item, preparation or medication specifically designed to prevent, treat or alleviate ailments or disorders involving the ear.

Includes synthetic products.

Specifically *excludes Wax Removal Candles and Wax Removal preparations.*

Excludes products such as Ear Preparations obtained only by prescription or from a healthcare professional and other healthcare products aimed at other areas of the body.
