Brick 10005448:
Annelids (Worms)

Definition

Includes any products that may be described/observed as usually elongated, segmented invertebrates. They are found in most wet environments, and include many terrestrial, freshwater, and especially marine species (such as the polychaetes), as well as some that are parasitic or mutualistic. These animals can range in length from under a millimetre to over 3 metres long.

Includes the well–known earthworms and leeches.

Excludes any arachnids or insects as well as any other invertebrates not affiliated with the Annelida group.

Climatic Zone (20002383)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the geographical zone, taking into account temperature, in which the animal lives prevails.

Attribute Values

Brick 10005447:

Arachnids (Spiders/Scorpions)

Definition

Includes any products that may be described/observed as invertebrates having jointed limbs and a segmented body with an exoskeleton made of chitin. These animals are mainly predatory.

Includes products such as spiders and scorpions.

Excludes products such as insects and worms as well as crustaceans.

Climatic Zone (20002383)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the geographical zone, taking into account temperature, in which the animal lives prevails.

Brick 10005454:
Coral/Sea Anemone

Definition

Includes any products that may be described/observed as invertebrates that secrete an internal, hard skeleton structure composed of calcium carbonate, which is absorbed from the surrounding water. Includes animals such as sea anemones.

Excludes products such as sea urchins, sea stars and sea sponges.

Brick 10005450:

Crustaceans

Definition

Includes any products that may be described/observed as invertebrates that have a segmented body, a hard external skeleton (exoskeleton), two sets of antennae and one pair of legs per body segment. These animas live in marine coastal environment.

Includes products such as shrimp, lobster and crabs.

Excludes products such as terrestrial animals as well as fish and cetaceans.

Brick 10005446:

Insects

Definition

Includes any products that may be described/observed as small air–breathing arthropods with three pairs of legs and jaws. These animals have an exoskeleton and thrive in all environments.

Includes animals such as ants, beetles and the butterfly.

Excludes products such as spiders and scorpions.

Climatic Zone (20002383)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the geographical zone, taking into account temperature, in which the animal lives prevails.

Brick 10005475:

Invertebrates Other

Definition

Includes any products that may be described/observed as an invertebrate animal, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified invertebrate animals.

Brick 10005453:

Jelly Fish

Definition

Includes any products that may be described/observed as a marine animal with a saucer–shaped, jelly–like body and stinging tentacles. As carnivorous animals these may be dangerous, containing toxins which are used to incapacitate prey.

Includes products such as the Portuguese Man–Of–War.

Excludes products such as sea urchins and sea anemones.

Brick 10005449:

Molluscs

Definition

Includes any products that may be described/observed as an invertebrate having a soft unsegmented body usually enclosed in a shell.

Includes products such as garden snails, and marine snails.

Excludes products such as crustaceans and insects.

Environment (20002382)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the natural environment in which the animal lives.

Brick 10005452:

Sea Stars/Sea Urchins

Definition

Includes any products that may be described/observed as radially symmetrical marine invertebrates found in the oceans at all depths. These animals can include both creatures that are attached to a fixed object or those that are free swimming.

Includes products such as coastal sea stars.

Excludes products such as sea sponges or worms or molluscs found in a marine environment.

Brick 10005451:

Sponges

Definition

Includes any products that may be described/observed as primitive, sessile, mostly marine, water dwelling filter feeders that pump water through their matrix to filter out particulates of food matter. Sponges are among the simplest of animals.

Includes products such as the Caribbean Red Sponge.

Excludes sponges found in the bathroom and used for self–cleansing, unless alive.

Brick 10005458:

Amphibians

Definition

Includes any products that may be described/observed as cold–blooded vertebrate typically living on land but breeding in water.

Includes products such as frogs, toads and salamanders.

Excludes products such as reptiles and fishes.

Climatic Zone (20002383)
