The primary purpose of this collection is to gather all the required data and details from individuals at the time, or soon thereafter, of an alleged incident occurring at or on an Exchange facility/property. This may include accidents, injuries, illnesses, mishaps, fires, shoplifting, or issues involving damages to government property involving Exchange employees, patrons (customers), guests, visitors or contractors. The Exchange uses information collected to complete the investigation relative to the incident, provide victim medical treatment, pay claims, recoup damages to assets and property, correct deficiencies, and probable civil or criminal prosecution action. Information may be included in managerial and statistical reports which are used in maximizing Exchange earnings by reducing losses through proper security measures and prevention of shoplifting and employee thefts.

Risks include unauthorized access to the system and data leakage. Records are maintained in a controlled facility. Physical entry is restricted by the use of locks, guards, and is accessible only to authorized personnel. Access to records is limited to person(s) with an official "need to know" who are responsible for servicing the record in performance of their official duties. Persons are properly screened and cleared for access. Access to computerized data is role-based and further restricted by passwords, which are changed periodically. In addition, integrity of automated data is ensured by internal audit procedures, data base access accounting reports and controls to preclude unauthorized disclosure.
