**Hazard:** The swing should never be used for sleep and bedding materials should never be added to it. If the product is used for sleep or bedding material is added, the headrest and body support insert on the seat pad can increase the risk of suffocation.

**Remedy:** Consumers should immediately remove both the headrest (by cutting the tether), and the body support insert from the seat pad before continuing to use the swing. Fisher-Price will provide a \$25 refund to consumers who remove and destroy the headrest and body support insert. Instructions can be found at [www.service.mattel.com](http://www.service.mattel.com).

**Incidents/Injuries:** Between 2012 and 2022, there have been reports of five deaths involving infants 1 to 3 months of age when the product was used for sleep. In most of those incidents, the infants were unrestrained and bedding materials were added to the product.
