Dairy Based Products / Meals – Not Ready to Eat/Drink (Frozen)

Definition

Includes any products that can be described/observed as a dairy mix, which is not ready to consume and has been prepared to a specific recipe where cream/milk/yogurt liquid or solids are the main ingredients with other ingredients such as chocolate/fruit/nuts. These ingredients form a valuable part of the product. These products may have a main component which is considered a meal without any additional components. The products may be packaged for the food service market or sold in retail outlets for use in home appliances such as ice cream makers and smoothie makers. Includes products such as ice cream mixes, soft serve ice cream mixes, smoothie mixes and yogurt mixes. Some products in this category require freezing after purchase and preparation in order to constitute the final product for consumption.

These products must be frozen to extend their consumable life.

Includes frozen Ready-Made Meals where a Dairy Based Product is the primary ingredient.

Excludes Ready-Made Combination Meals.

Excludes all ready-to-eat/drink dairy based products and perishable not-ready-to eat/drink dairy based products.

If Organic (20000142)

Dairy/Egg Based Products / Meals Variety Packs

Definition

Includes any products that can be described/observed as two or more distinct Dairy or Egg based products, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Dairy/Egg Based Products class.

Includes products such as omelette and ice cream not ready to eat.

Items that are received free with purchases should be removed from the classification decision–making process.

Specifically excludes all eggs to which no recipe has been applied.Excludes products such as dairy egg based products and In shell Table eggs.

Excludes products such as ot ready to eat /not ready to eat egg based products grouped with dough or grain based products.

Brick 10005224:

Egg Based Products / Meals – Not Ready to Eat (Frozen)

Definition

Includes any products that can be described/observed as an egg based product, not ready to eat, which has been prepared to a specific recipe where eggs are the main ingredient with other ingredients such as protein, vegetables or sauce. These ingredients form a valuable part of the product. Omelettes and souffles would be examples of prepared egg based products.

These products require cooking prior to consumption.

These products must be frozen to extend their consumable life.

Includes not ready to eat shelf stable Ready-Made Meals where an Egg Based Product is the primary ingredient.

Excludes Ready-Made Combination Meals.

Specifically excludes all eggs to which no recipe has been applied.

Excludes products such as perishable and shelf stable not ready to eat egg based products as well as dough or grain based products that may have added egg ingredients that are classified elsewhere.

Differentiating Ingredient (20000232)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the ingredient(s) which differentiate the types of products.

Dough Based Products / Meals – Not Ready to Eat – Savoury (Frozen)

Definition

Includes any products that can be described/observed as a savoury dough-based not ready to eat, prepared/processed product, such as Pasta, Gnocchi, Noodles or Batter, with other ingredients, such as meat, dairy, eggs, fish, vegetables and/or seasoning. An optional seasoning/flavour packet may be present. These ingredients form a valuable part of the product, such as the meat/tomato sauce in Spaghetti Bolognaise, or cheese sauce in Macaroni and Cheese. They may or may not contain a sauce.

These products are not ready to eat and require cooking prior to consumption. These products may have a main component which is considered a meal without any additional components.

These products must be frozen to extend their consumable life.

Includes frozen Ready-Made Meals where a Dough Based Product is the primary ingredient.

Excludes Ready-Made Combination Meals.

Specifically excludes pizza and savoury pies, quiches, pastries and bread products.

Excludes products such as Shelf Stable and Perishable Not Ready to Eat and Ready to Eat Dough-Based Prepared/Processed Products, Pasta and Noodles Unprepared.

Dough Based Products / Meals – Ready to Eat – Savoury (Shelf Stable)

Definition

Includes any products that can be described/observed as a savoury dough-based ready to eat, prepared/processed product, such as Pasta, Gnocchi or Noodles, with other ingredients, such as meat, dairy, eggs, fish, vegetables and/or seasoning. An optional seasoning/flavour packet may be present. These ingredients form a valuable part of the product, such as tuna and salad in a Tuna Pasta Salad. They may or may not contain a sauce. These products may have a main component which is considered a meal without any additional components.

These products do not require cooking prior to consumption, but some products can be eaten hot after reheating.

These products have been treated or packaged in such a way as to extend their consumable life.

Includes ready to eat shelf stable Ready-Made Meals where a Dough Based Product is the primary ingredient.

Excludes Ready-Made Combination Meals.

Specifically excludes pizza, savoury pies, pastries, quiches and bread products.

Excludes products such as Perishable Ready to Eat and Not Ready to Eat Dough Based Prepared/Processed Products, Unprepared Pasta and Noodles, Dried Pasta and Noodles.

Differentiating Ingredient (20000232)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the ingredient(s) which differentiate the types of products.

Grain Based Products / Meals – Ready to Eat – Savoury (Shelf Stable)

Definition

Includes any products that can be described/observed as a savoury grain-based ready to eat, prepared/processed product, such as Rice, Polenta or Couscous with other ingredients, such as meat, eggs, fish, vegetables, and/or seasoning. An optional seasoning/flavour packet may be present. These ingredients form a valuable part of the product, such as Couscous with Vegetables. These products may have a main component which is considered a meal without any additional components. These products must not include any dough-based products. They may or may not contain a sauce.

These products do not require cooking prior to consumption, but some products can be eaten hot after reheating.

These products have been treated or packaged in such a way as to extend their consumable life.

Includes ready to eat shelf stable Ready-Made Meals where a Grain Based Product is the primary ingredient.

Excludes Ready-Made Combination Meals.

Specifically excludes all unprepared dried rice.

Excludes products such as Perishable Ready to Eat and all Not Ready to Eat Grain Based Prepared/Processed Products and Unprepared Grains.

Differentiating Ingredient (20000232)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the ingredient(s) which differentiate the types of products.

Grain Based Products / Meals Variety Packs

Definition

Includes any products that can be described/observed as a two or more distinct Grain Based Products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Grain Based Products class.

Includes products such as Grain based product (e.g. Chili con carne) and Grain based product (e.g. couscous fish salad) sold together.

Items that are received free with purchases should be removed from the classification decision–making process.

Excludes products grouping such as Grain Based Prepared Products and Unprepared Grains.

Brick 10005823:

Meat Substitutes (Frozen)

Definition

Includes all products which can be described/observed as a healthy food alternative to meat, vegetable and egg proteins. The products in this group consist of mycoproteins, which are made from edible fungus. The frozen alternatives contribute a major recipe ingredient in vegetarian ready–meals such as pizza, lasagne and cottage pie.

These products must be frozen to extend their consumable life.

Excludes all meat–based products and any other protein rich products such as eggs and pulses that constitute the main recipe ingredients. Also excludes perishable and shelf stable meat substitute products

Method of Cooking/Reheating (20000134)

Ready-Made Combination Meals – Not Ready to Eat (Perishable)

Definition

Ready-made combination meal or microwave meal is a pre-packaged perishable full meal. The meal requires no preparation other than cooking and contains all the elements typically contained in a single-serving meal. A ready-made meal (also known as a TV Dinner) must have a main component and at least one addtional component such as a side item, a dessert and/or beverage.

These products require cooking prior to consumption.

These products must be refrigerated to extend their consumable life.

Excludes products such as Non-Combination Meals, Shelf Stable Not Ready to Eat Combination Meals, Frozen Not Ready to Eat Combination Meals, Ready to Eat Combination Meals, Ready-Made Combination Meal Varety Packs, Prepared/Processed Products, and Unprepared Meals.

Consumer Lifestage (20000045)

Brick 10006754:

Ready-Made Combination Meals – Not Ready to Eat Variety Packs

Definition

Includes any products that can be described/observed as a two or more distinct Ready-Made Combination Not Ready to Eat Meals sold together, which exist within the schema belonging to different bricks but within the Ready-Made Combination Meals Products class.

These products require cooking prior to consumption. Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Non-Combination Meals, Ready to Eat Combination Meals, Not Ready to Eat Combination Meals, Ready-Made Combination Meals Ready to Eat Variety Packs, Prepared/Processed Products, and Unprepared Meals.

Brick 10006751:

Ready-Made Combination Meals – Ready to Eat (Perishable)

Definition

Ready-made combination meal or microwave meal is a pre-packaged perishable full meal. The meal requires no preparation, but may be warmed, and contains all the elements typically contained in a single-serving meal. A ready-made meal (also known as a TV Dinner) must have a main component and at least one addtional component such as a side item, a dessert and/or beverage.

These products must be refrigerated to extend their consumable life.

Excludes products such as Non-Combination Meals, Shelf Stable Ready to Eat Combination Meals, Not Ready to Eat Combination Meals, Ready-Made Combination Meal Varety Packs, Prepared/Processed Products, and Unprepared Meals.

Brick 10006753:

Ready-Made Combination Meals – Ready to Eat Variety Packs

Definition

Includes any products that can be described/observed as a two or more distinct Ready-Made Combination Ready to Eat Meals sold together, which exist within the schema belonging to different bricks but within the Ready-Made Combination Meals Products class. Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Non-Combination Meals, Ready to Eat Combination Meals, Not Ready to Eat Combination Meals, Ready-Made Combination Meals Not Ready to Eat Variety Packs, Prepared/Processed Products, and Unprepared Meals.

Brick 10000254:

Sandwiches/Filled Rolls/Wraps (Frozen)

Definition

Includes any products that can be described/observed as a frozen leavened or unleavened, baked bread product from which slices, or the whole loaf, may be used to wrap or enclose a combination of one or more ingredients.

These products must be frozen to extend their consumable life.

Includes ready to eat products and products eaten hot or cold, once thawed.

Excludes products such as Perishable Sandwiches, Filled Rolls and Wraps.

If Organic (20000142)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging the descriptive term that is used by the product manufacturer to identify the presence of an industry recognized "organic" certification upon the product labelling or packaging.

Vegetable Based Products / Meals – Not Ready to Eat (Perishable)

Definition

Includes any products that can be described/observed as a vegetable based not ready to eat, prepared/ processed product, such as Potato, Cabbage, Eggplant or any other vegetable with other ingredients, such as meat, poultry, fish, and/or seasoning. An optional seasoning/flavour packet may be present. These ingredients form a valuable part of the product, such as Chicken Breast with Steamed Vegetables. These products may have a main component which is considered a meal without any additional components. These products must not include any Dough Based, Grain Based, Dairy/Egg Based products. They may or may not contain a sauce.

These products require cooking prior to consumption.

These products must be refrigerated to extend their consumable life.

Includes not ready to eat perishable Ready-Made Meals where a Vegetable Based Product is the primary ingredient.

Excludes Ready-Made Combination Meals.

Specifically excludes all prepared and processed and unprepared and unprocessed vegetables to which no recipe has been applied.

Excludes products such as Shelf Stable and Frozen Not Ready to Eat and all Ready to Eat Vegetable-Based Prepared/Processed Products and all Prepared and Processed Vegetables.

Differentiating Ingredient (20000232)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the ingredient(s) which differentiate the types of products.
