Brick 10002151: Kitchen Cookware/Bakeware Variety Packs

Definition

Includes any products than can be described/observed as two or more distinct household cookware and bakeware products sold together, which exist within the schema belonging to different bricks but to the same class, that is, two or more products contained within the same pack which cross bricks within the Cookware/Bakeware class.

Includes products such as an oven roasting pan and a hob pot sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as pots and kitchen utensils variety packs.

Brick 10006331: Disposable Food Containers

Definition

Includes any products that can be described/observed as products that are used to contain not prepackaged prepared or semi-prepared product for the purpose of transport. The content may or may not be consumed from the container.

Includes Take-Out, Take-Away, Carry-Out or Parcel Containers.

The products include bowls with lids, doggie bags, pizza boxes, Chinese food take-out containers, fast food take out bags, etc.

Excludes products such as napkins, straws, plastic cutlery, and chop sticks.

If Disposable (2000097)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product is intended to be disposed of after single use or a limited period of use.

Brick 10006333:

Disposable Food Containers Other

Definition

Includes any products that can be described/observed that are used to take prepared or unprepared product from the preparation source to another destination for the purpose of consumption, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified take out containers.

Brick 10006332: Disposable Food Containers Variety Packs

Definition

Includes any products than can be described/observed as two or more distinct disposable food container products sold together, which exist within the schema belonging to different bricks but to the same class, that is, two or more products contained within the same pack which cross bricks within the Take out Containers class.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as lids and cups or bottoms and tops variety packs which are intended to be sold together.

Brick 10002136: Cooking Timers (Non Powered)

Definition

Includes any products that can be described/observed as a non-powered device, used for measuring and signalling the end of a selected time to cook a particular food or meal.

Includes products such as egg timers.

Excludes products such as powered kitchen timers, clocks and watches.

Type of Cooking Timer (Non Powered) (20001675)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of non-powered cooking timer.

Brick 10002142:
Food Measuring Equipment Other

Definition

Includes any products that can be described/observed as food measuring equipment, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Food Measuring Equipment as well as products such as personal scales classified in Healthcare.

Brick 10002141: Food Measuring Equipment Variety Packs

Definition

Includes any products than can be described/observed as two or more distinct kitchen measuring tools sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Food Measuring Equipment class.

Includes products such as a cooking timer and thermometer sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as a kitchen scale and kitchen utensils variety pack.

Brick 10002140: Food Thermometers

Definition

Includes any products that can be described/observed as an instrument for measuring temperature of food while cooking.

Includes products such as digital thermometers, manually operated dial food thermometers, disposable temperature indicators designed for particular foods and pop-ups that are inserted into the food and pop-up when the desired temperature is reached.

Excludes products such as thermometers not specifically designed for measuring food temperature.

Type of Food Thermometer (20001679)

Brick 10002143:
Kitchen Scales (Non Powered)

Definition

Includes any products that can be described/observed as a non-powered instrument or machine for weighing food.

Specifically *excludes powered kitchen scales.*

Excludes products such as scales not specifically designed for weighing food.

Brick 10005434: Cookie Guns/Food Decorating Syringes (Non Powered)

Definition

Includes any products that can be described/observed as a cylinder that can be filled with dough, which is then dispensed by means of a syringe type action using a hand operated plunger. The dough can be pushed out through a variety of cutting discs or decorating nozzles, which help to enhance the presentation of the pastry or cookies.

Includes products that are equipped with thickness regulators and the equipment can be made of metal or plastic.

Excludes products such as icing cones, pastry bags and food-shaping moulds.

Type of Material (20000794)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.
