

## Brick 10005846: Storage Barrels/Kegs (Empty)

### Definition

Includes any products that may be described/observed as a cylindrical, usually convex, container whose bottom end is permanently fixed to the body and top end (head) is either removable or non-removable. These reusable containers have been designed to carry mostly liquids, may be made out of a number of materials or combinations of them and are normally transported on a barrel/drum pallet.

*Excludes other types of liquid containers such as drums and gas/fuel cylinders.*

### If Removable Lid (20002717)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product has a lid that can be removed.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### If UV Resistant (20002632)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is resistant against the sun's UV rays.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### If With Handles (20001720)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product has handles to facilitate being moved or carried.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

## **Type of Material (20000794)**

### **Attribute Definition**

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

### **Attribute Values**

COMBINATION (30000720)

PLASTIC (30004152)

UNIDENTIFIED (30002518)

METAL (30004052)

WOOD (30004369)

## Brick 10005847: Storage Drums (Empty)

### Definition

Includes any products that may be described/observed as a reusable cylindrical container with straight sides used for shipping or storing liquids, may be made out of a number of materials or combinations of them and are normally transported on a barrel/drum pallet.

*Excludes other types of liquid containers such as barrels, kegs and gas/fuel cylinders.*

### If With Handles (20001720)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product has handles to facilitate being moved or carried.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### Type of Material (20000794)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

#### Attribute Values

COMBINATION (30000720)                      PLASTIC (30004152)                      UNIDENTIFIED (30002518)  
METAL (30004052)                      UNCLASSIFIED (30002515)

# Brick 10005852: Portable Storage Cylinders (Empty)

## Definition

Includes any products that may be described/observed as a portable, reusable rigid cylindrical container with straight sides and circular, sometimes convex ends of equal size. These reusable containers can be designed to hold and dispense pressurised gas and may be made out of a number of materials or combinations of them.

*Excludes products such as non-refillable gas canisters and drum containers used for storing liquid fuels and lubricants.*

## Target Use/Application (20001709)

### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the target use and/or application.

### Attribute Values

CORROSIVE/OXIDISING  
MATERIAL STORAGE  
(30014555)

(30014553)  
TOXIC MATERIAL STORAGE  
(30014556)

UNCLASSIFIED (30002515)  
UNIDENTIFIED (30002518)

## **Brick 10005851: Storage Bottles (Empty)**

### **Definition**

Includes any products that may be described/observed as a reusable container having a round neck of relatively smaller diameter than the body and an opening capable of holding a closure for retention of the contents. Specifically, a narrow-necked container as compared with a wide-mouth container such as a cylinder or drum. These products are specifically intended to be reused after contents are consumed when they are refilled, sealed and returned to the retail supply chain. They may be made out of a number of materials or combinations of them.

Includes reusable empty bottles that can contain non alcoholic beverages such as milk or soda or alcoholic beverages such as wine or beer.

*Excludes products such as storage bottles for household and domestic purposes and reusable cylinders.*

### **Target Use/Application (20001709)**

#### **Attribute Definition**

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the target use and/or application.

#### **Attribute Values**

## Brick 10005857: Pallet Converters/Frames

### Definition

Includes any product that can be described/observed as a frame that turns a pallet into a storage container. The frame structure can be adapted to fit around the periphery of a load. Each frame wall is an openwork structure formed from metal bars, which are interconnected by hinge joints so that the frame structure can be folded flat for storage when not in use.

*Excludes products such as pallets and racks.*

### If Foldable/Collapsible (20002720)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product is foldable/collapsible.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### If With Drop Gate (20002718)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product has a drop gate.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### Type of Frame/Pallet Converter (20002719)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of frame/pallet converter.

#### Attribute Values

COLLAR (30005748)                      RACKING FRAME (30014557)                      UNIDENTIFIED (30002518)

## Pallets

### Definition

Includes any products that can be described/observed as a platform used to hold or transport unit loads. The flat transport structure supports goods in a stable fashion while being lifted by a forklift, pallet jack, front loader or other jacking device. A pallet is the structural foundation of a unit load which allows handling and storage efficiencies. Goods or shipping containers are often placed on a pallet secured with strapping, stretch wrap or shrink wrap and shipped. Pallets may be made out of a number of materials or combinations of them.

*Excludes products such as pallet converters and racks.*

### ISO Rating (20002722)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the ISO rating.

#### Attribute Values

ISO 0 (30015375)	ISO 3 (30014560)	ISO 6 (30014563)
ISO 1 (30014558)	ISO 4 (30014561)	UNCLASSIFIED (30002515)
ISO 2 (30014559)	ISO 5 (30014562)	UNIDENTIFIED (30002518)

### Number of Pick-up Ways (20002721)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the number of ways the product can be lifted.

#### Attribute Values

FOUR WAY (30014565)	TWO WAY (30014564)	UNCLASSIFIED (30002515)	UNIDENTIFIED (30002518)

### Racks

#### Definition

Includes any products that can be described/observed as a framework or stand for carrying, holding, or storing items. Commonly on wheels and primarily used in logistical functions to deliver items such as hanging garments, or items on shelves such as dairy products and bakery items and flowers. They may be made out of a number of materials or combinations of them.

*Excludes products such as pallets, converters and transport dollies.*

#### Type of Material (20000794)

##### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

## Slip Sheets

### Definition

Includes any products that can be described/observed as firm sheet of plastic, cardboard or other material which may be hooked or attached to a forklift or other transportation equipment. The slip sheet is used to pull products stacked on top of it.

*Excludes automotive cargo management products already classified such as tarpaulins and tie downs.*

### Type of Lip (20002724)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the lifting device or lip (tab) that extends beyond one or more of the sides of the slip sheet.

#### Attribute Values

MULTI LIP (30014567)                      SINGLE LIP (30014566)                      UNCLASSIFIED (30002515)                      UNIDENTIFIED (30002518)

# Brick 10005855: Transport Dollies

## Definition

Includes any product that can be described/observed as a low mobile platform that rolls on casters and is used as a base for assembling, storing, stacking, handling and transporting goods as a unit, and suitable for manually positioning.

*Excludes products such as racks.*

## Type of Material (20000794)

### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

### Attribute Values

## Brick 10005848: Storage/Haulage Boxes (Empty)

### Definition

Includes any products that can be described/observed as a reusable rigid, three-dimensional container with closed faces that completely enclose its contents and may be made out of any material.

*Excludes products such as crates and converter frames and any classified box that is not used as a reusable storage/haulage container.*

### If Partitioned (20002727)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify if the product is partitioned.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### If With Collapsible Sides (20002725)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product has collapsible sides.

#### Attribute Values

## Brick 10005860: Air Freight Containers (Empty)

### Definition

Includes any products that can be described/observed as a unit load device (ULD), either a pallet or container, used specifically to load luggage, freight, and mail onto a wide-body aircraft or specifically a narrow-body aircraft. The air freight containers allow a large quantity of cargo to be bundled into a single unit and facilitate a one-time load.

*Excludes ocean freight containers and rigid intermediate bulk containers.*

### Type of Unit Load Device (ULD) (20002729)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the unit load device.

#### Attribute Values

LD-1 (30014570)	LD-5 (30014574)	LD-8 CONTAINER (30014578)	UNIDENTIFIED (30002518)

## Brick 10005861: Flexible Bulk Containers (Empty)

### Definition

Includes any products that can be described/observed as a reusable non-rigid container used for transport and storage of fluids and other bulk materials. The construction of the Flexible Intermediate Bulk Container (FIBC) and the materials used are chosen depending on the application.

*Excludes products such as rigid intermediate bulk containers.*

### If UV Protection Claim (20001642)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product provides UV Protection.

#### Attribute Values

NO (30002960)                      UNIDENTIFIED (30002518)                      YES (30002654)

### Type of Material (20000794)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

#### Attribute Values

UNIDENTIFIED (30002518)

# Brick 10005859:

## Ocean Intermodal Freight Containers (Empty)

### Definition

Includes any products that can be described/observed as a large ocean container that is suitable for multiple modes of transportation (rail, ship, and truck) without any handling of the freight itself when changing modes. The method reduces cargo handling, and so improves security, reduces damages and losses, and allows freight to be transported faster. Reduced costs versus over road trucking is the key benefit for intercontinental use.

*Excludes products such as air freight containers and storage tanks.*

### ISO Rating (20002722)

#### Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the ISO rating.

#### Attribute Values

## Brick 10005853: Storage/Haulage Tanks (Empty)

### Definition

Includes any products that can be described/observed as a very large, often customised container that may hold water, foodstuffs, hydrogen peroxide, gases and other materials both hazardous and non-hazardous. Common types of ISO tanks include dry tanks, insulated or heated ISO containers, open-top and flat-rock ISO tanks. These reusable containers are mostly transported by road or rail and may be made out of a number of materials or combinations of them.

*Excludes products such as portable cylinders, ocean intermodal freight containers, air freight containers, intermediate bulk containers and flexible bulk containers.*

### If Caged (20002731)

#### Attribute Definition
