Subject: Transportation Management System (TMS)

To all AAFES Vendors:

AAFES logistics has recently implemented a new Transportation Management System (TMS) that will require all Vendors with FOB Origin terms convert to the new TMS system to obtain routing for their freight. Effective **June 14, 2004**, AAFES Logistics and SELECT vendors will begin using the new TMS system. All other vendors will be contacted by an AAFES associate that will assist them in setting up and enabling them to use TMS. Once a vendor has been set up to use TMS, they will no longer receive routing instructions on purchase orders. ALL routing will be scheduled using TMS.

Beginning **May 26, 2004**, the TMS user guide for the vendor web application will be available on the EDI home page <http://www.aafes.com/edi/default.asp>. TMS will become available via EDI and the EDI requirements will be published at a later date.

Vendors that would like to go ahead and get set up on the TMS system prior to being contacted by an AAFES associate may do so. Vendors should contact Denise Montes (214)312-3122 or Email zzlgtmsadmin@aafes.com.

Thanks for you cooperation.

Steve Richardson

Vice President
AAFES Logistics
