820 Payment Order/Remittance Advice

Functional Group ID=**RA**

Introduction:

This X12 Transaction Set contains the format and establishes the data contents of the Payment Order/Remittance Advice Transaction Set (820) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to make a payment, send a remittance advice, or make a payment and send a remittance advice. This transaction set can be an order to a financial institution to make a payment to a payee. It can also be a remittance advice identifying the detail needed to perform cash application to the payee's accounts receivable system. The remittance advice can go directly from payer to payee, through a financial institution, or through a third party agent.

Notes:

The following document identifies the AAFES business requirements for 820 Payment Order/Remittance Advise. All segments marked "R" are required by AAFES to process the electronic payment order/remittance advise. Elements marked "M" are required by standards. All elements defined may be in their respective segments.

| 25 | 0100 | SE | Transaction Set Trailer | М | 1 | | |

Transaction Set Notes

- 1. The ENT loop is for vendor or consumer third party consolidated payments.
- 2. The TXP loop is for tax payments.
- **3.** The DED loop is for child support payments.
- 4. The LX loop is for pension payments.
- 5. The N9 loop is for payroll payments.
- 6. The RYL loop is for royalty payments.

Transaction Set Comments

- 1. The TRN segment is used to uniquely identify a payment order/remittance advice.
- 2. The CUR segment does not initiate a foreign exchange transaction.
- **3.** The N1 loop allows for name/address information for the payer and payee which would be utilized to address remittance(s) for delivery.
- 4. ENT09 may contain the payee's accounts receivable customer number.
- 5. Allowing the NM1 segment to repeat in this area allows the paying entity within a payer and the paid entity within a payee to be identified (not the payer and payee).
- 6. This ADX loop contains adjustment items which are not netted to an RMR segment in this transaction set.
- 7. Loop IT1 within the ADX loop is the adjustment line item detail loop.
- 8. Loop RMR is for open items being referenced or for payment on account.
- 9. Loop IT1 within the RMR loop is the remittance line item detail loop.
- **10.** This ADX loop can only contain adjustment information for the immediately preceding RMR segment and affects the amount (RMR04) calculation. If this adjustment amount is not netted to the immediately preceding RMR, use the outer ADX loop (position 080).
- **11.** Loop IT1 within the ADX loop is the adjustment line item detail loop.
- **12.** The AMT segment can be used to provide information about allocation or distribution of net pay that is split across multiple payment orders.

| ST Transaction Set Header |
|--|
| 0100 |
| |
| Heading |
| Mandatory |
| 1 |
| To indicate the start of a transaction set and to assign a control number |
| |
| The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set). The implementation convention reference (ST03) is used by the translation routines of the interchange partners to select the appropriate implementation convention to match the transaction set definition. When used, this implementation convention reference takes precedence over the implementation reference specified in the GS08. |
| |

| Segment: | ENT Entity |
|-----------------|--|
| Position: | 0100 |
| | |
| Loop: | 1 / |
| Level: | Detail |
| Usage: | Optional (Recommended) |
| Max Use: | |
| Purpose: | To designate the entities which are parties to a transaction and specify a reference meaningful to those entities |
| Syntax Notes: | 1 If any of ENT02 ENT03 or ENT04 is present, then all are required. |
| | 2 If any of ENT05 ENT06 or ENT07 is present, then all are required. |
| | 3 If either ENT08 or ENT09 is present, then the other is required. |
| Semantic Notes: | |
| Comments: | This segment allows for the grouping of data by entity/entities at or within a master/masters. A master (e.g., an organization) can be comprised of numerous subgroups (e.g., entities). This master may send grouped data to another master (e.g., an organization) which is comprised of one or more entities. Groupings are as follows: Single/Single: Only ENT01 is necessary, because there is a single entity (the sending master) communicating with a single entity (the receiving master). Single/Multiple: ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. The sending master is a single entity, so no other data elements need be used. Multiple/Single: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. The receiving master is a single entity, so no other data elements need be used. Multiple/Multiple: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the sending master. The receiving master is a single entity, so no other data elements need be used. Multiple/Multiple: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. |

| | Segment: Position: Loop: Level: Usage: Max Use: Purpose: Syntax Notes: Semantic Notes: Comments: Notes: | ADX Adjustment 2100 ADX Optional Detail Optional 1 To convey accounts-payable adjustment information for the purpose of cash application, including payer-generated debit/credit memos 1 If either ADX03 or ADX04 is present, then the other is required. 1 ADX01 specifies the amount of the adjustment and must be signed if negative. If negative, it reduces the payment amount; if positive, it increases the payment amount. 2 ADX02 specifies the reason for claiming the adjustment. 3 ADX03 and ADX04 specify the identification of the adjustment. AAFES can send up to 5 occurrences of the ADX segment for each invoice. They are prompt payment penalty, prompt payment interest, distribution allowance, unauthorized additional charges. | | | | | | | | |
