

Brick 10003157: Abrasive Pads/Steel Wool

Definition

Includes any products that may be described/observed as a pad of woven steel fibres or a loosely assembled ball of steel fibres that are used as an abrasive to remove rust, prepare surfaces and give a smooth finish to metal, plastic and wood.

Excludes products such as sandpaper and emery cloths.

Texture of Steel Wool (20002272)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the texture of steel wool based on its relative coarseness.

Attribute Values

Brick 10003163: Abrasives Other

Definition

Includes any products that may be described/observed as Abrasives products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Abrasives products.

Brick 10005124:

Abrasives Replacement Parts-Accessories

Definition

Includes any products that can be described/observed as a replacement part or an individual component for abrasives. The products also include accessories specifically designed to enhance the performance of an abrasive.

Excludes products such as abrasives.

Type of Accessory (20001336)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of accessory.

Brick 10003164: Abrasives Variety Packs

Definition

Includes any products that may be described/observed as two or more distinct Abrasives products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Abrasives class.

Includes products such as Mineral Abrasives sold with Sandpaper.

Items received free with purchases should be removed from the classification decision-making process.

Excludes products such as Sandpaper multipacks.

Brick 10003159: Emery Cloths/Sheets

Definition

Includes any products that may be described/observed as a cloth covered in fragments of the hard grey–black mineral emery, which consists of corundum and either haematite or magnetite. These products are used for removing burrs and cleaning metalwork.

Excludes products such as Sandpaper and Steel Wool.

Type of Grit (20002388)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the texture or fineness of the grit.

Wire Brushes

Definition

Includes any products that may be described/observed as a brush made from a large number of wire bristles. The wire brush is primarily an abrasive implement, used for cleaning rust and removing paint.

Excludes products such as emery cloths, steel wool and sandpaper.

Brick 10002521: Aggregate

Definition

Includes any products that may be described/observed as a coarse material, such as gravel or broken stone with which cement and water are mixed to form concrete. Crushed stone is usually designated as coarse aggregate and gravel is broken down further to form the majority of finer aggregate.

Includes products such as aggregate used in construction.

Excludes products such as concrete mixes as well as sand.

Type of Aggregate (20002399)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of aggregate in relation to its composition.

Includes any products that may be described/observed as asphalt, concrete or masonry products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified asphalt, concrete and masonry products.

Brick 10005632:

Asphalt/Concrete/Masonry Replacement Parts/Accessories

Definition

Includes any products that can be described/observed as an accessory or replacement part for asphalt, concrete or masonry items.

Includes products such as mortar mixing boards and asphalt brushes.

Excludes all other products currently classified within the Asphalt/Concrete/Masonry class.

Type of Accessory (20001336)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of accessory.

Includes any products that may be described/observed as two or more distinct asphalt, concrete or masonry products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Asphalt/Concrete/Masonry class.

Includes products such as Asphalt/Concrete Patching and Asphalt/Concrete/Masonry Replacement Parts/Accessories sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Wire Brushes sold with Plaster Mixes.

Brick 10002525:

Brick/Block

Definition

Includes any product that may be described/observed as a basic building unit made from a mix of clay with silt and sand pressed in moulds and then burned in a kiln, which gives the characteristic slightly glazed finish.

Includes products such as solid, frogged, perforated, wirecut, stock, handmade, fletton, or engineering bricks as well as hollow blocks.

Excludes products such as pavers, building stone.

Type of Bricks/Blocks (20002398)

Brick 10002526:

Cement

Definition

Includes any products that may be described/observed as a building material that is a powder made of a mixture of oxides of calcium, silicon and aluminium by heating limestone (as source of calcium) with clay or sand (as source of silicon) and grinding the product, with a source of sulphate (most commonly gypsum). The resulting powder, when mixed with water, will become a hydrated solid over time; used with water and sand or gravel to make concrete and mortar.

Includes Portland cement and plastic cement to which a plasticising material (limestone or hydrated lime), as well as other materials has been added to reduce setting time and facilitate workability.

Excludes products such as concrete.

Type of Cement (20002393)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of cement in relation to its composition.

Brick 10003901: Concrete Air-entraining Agents

Definition

Includes any products that may be described/observed as an agent that entrains microscopic air bubbles in the concrete: when the hardened concrete freezes, the frozen water inside the concrete expands into these air bubbles instead of damaging the concrete. These products must be used whenever concrete is exposed to freezing and thawing, as well as to de-icing salts.

Excludes concrete dyes and bonding agents.

Brick 10003899: Concrete Bonding Agents

Definition

Includes any products that may be described/observed as agents, specifically designed to help bond new concrete to old or, when mixed with sand, to make a patching mortar or machinery base plate grout. Products include those that come complete with a slow setting bonding agents and aggregate that can be blended to a mortar for filling large voids and grouting large plates of heavy equipment.

Excludes concrete mixes and agents as well as concrete dyes and training agents.

Brick 10003900:

Concrete Colouring Agents/Dyes

Definition

Includes any products that may be described/observed as an agent that can either be added to concrete as it is mixed using special integral colourants, or a dye that can be added to freshly poured concrete as it is drying using powdered colour hardeners. These products also include agents or dyes that can be added after the concrete has hardened.

Excludes concrete mixes, training agents and binding agents as well as floor paints.

Formation (20000352)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the state in which the product is sold.

Doors – Storm/Screen Combination

Definition

Includes any products that may be described/observed as a storm door that comes with combinations of screen and glass panels.

Excludes screens sold separately.

Brick 10003923:

Doors Other

Definition

Includes any products that may be described/observed as Door products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Door products.

Brick 10003924: Doors Variety Packs

Definition

Includes any products that may be described/observed as two or more distinct Door products sold together, which exist within the schema belonging to different classes but to the same family.

Excludes products sold separately.

Brick 10006404:

Gate/Garage Door Opener Replacement Parts and Accessories

Definition

Includes any items used together with a automatic garage door or gate. Includes items like keypads, receivers or transmitters.

Brick 10003179: Anchors/Wall Plugs (Fixings/Fasteners)

Definition

Includes any products that may be described/observed as a fastening which allows you to fix objects to brick, masonry, or concrete. The product is inserted into a drilled hole and a screw driven into the insert, which in turn can secure an object to the wall. These products are available in range of different sizes and materials based on the consumers requirements.

Includes products such as Plastic Wall Plugs as well as Stainless Steel Shield Anchors and Hollow Wall Anchors.

Excludes products such as Electrical Plugs, Brackets/Braces, Caps and Clips as well as Hooks and Nails.

Material of Anchor (20001987)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the material of the anchor.

Brick 10003170: Bearings/Bushings

Definition

Includes any products that may be described/observed as a rotating support placed between moving parts to allow them to move easily. A bearing is a component used to reduce friction in a machine. A bushing can be described as an insulator found on electrical equipment. A bushing is a metal sleeve or lining that acts as a bearing between rotating or moving electrical surfaces.

Includes products such as Bearings and Bushings.

Excludes products such as Rings and Grommets as well as Washers and Screw Caps and Screw Cups.

Brick 10003185:

Bolts/Threaded Rods

Definition

Includes any products that may be described/observed as a threaded fastener, which may or may not have a head designed to be used in conjunction with a nut to form a secure type of fastening. They are available in many different sizes and materials.

Includes products such as hexagon bolts, high tensile bolts and threaded rods.

Excludes products such as door and window bolts and nuts and screws.

Type of Bolt/Threaded Rod (20002467)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to describe the type of bolt or threaded rod.

Brick 10002449: Flooring – Cork/Bamboo

Definition

Includes any products that may be described/observed as a floor covering formed of the bark of the cork oak tree or the hard stems of bamboo grass. These products are used in used in numbers to form patterns across a designated area.

Excludes products such as cork wall covering as well as wood flooring.

Formation (20000352)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the state in which the product is sold.

Attribute Values

FLOOR TILE (30009987)

ROLL (30002040)

UNIDENTIFIED (30002518)

PLANK (30012007)

UNCLASSIFIED (30002515)

If Finished (20002293)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product has an extra coating applied to reduce weathering prior to distribution.

Attribute Values

NO (30002960)

Brick 10002452: Flooring Other

Definition

Includes any products that may be described/observed as Flooring products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Flooring products.

Brick 10002453: Flooring Variety Packs

Definition

Includes any product that may be described/observed as two or more distinct flooring products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the flooring class.

Includes products such as Floor Tiles and Floor Tile Accessories sold together.

Items received free with purchases should be removed from the classification decision-making process.

Excludes products such as Cork Flooring sold with adhesive.

Brick 10002532: Shims/Spacers

Definition

Includes any product that may be described/observed as a thin, often tapered, piece of material, such as metal, used to fill in space between things for support, adjustment, or levelling.

Includes products such as adjustable spacer, spindle spacer.

Excludes products such as wedges.

Brick 10003926: Decorative Glass Inserts

Definition

Includes any products that may be described/observed as a glass section placed in a door or window to enhance its appearance.

Includes stained glass, lead came glass and textured glass inserts.

Excludes products such as window panes and glass blocks.

Brick 10002584:

Glass

Definition

Includes any product that may be described/observed as an amorphous solid obtained when silica is mixed with other compounds, heated above its melting point, and then cooled rapidly.

Includes products such as windowpanes, sheet glass as well as bulletproof glass.

Excludes products such as acrylic / plastic sheets, glass block and glass inserts.

If Bulletproof (20002480)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the glass has been reinforced to be impenetrable by bullets.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

If Energy Saving (20000771)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether or not the product is energy saving.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

If Obscured (20002481)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the glass has a design rolled onto one side during manufacture for decorative effect and/or to provide privacy.

Attribute Values

NO (30002960) UNIDENTIFIED (30002518) YES (30002654)

Brick 10003925: Glass Block (Grid Systems)

Definition

Includes any products that may be described/observed as a translucent glass blocks that are held together with mortar or plastic strips with silicon sealant and used to build non-bearing walls or partitions.

Excludes products such as glass sheets, window panes and glass inserts.

Brick 10003956:

Down Spout Parts/Fittings

Definition

Includes any products that may be described/observed as a system of pipes and parts that allows for the controlled flow of waste water vertically, towards a drain or underground water disposal system.

Includes products such as Wood, Galvanized Sheet Metal, Copper, Aluminium and Vinyl products.

Excludes products such as Lawn Drainage Parts/Fittings and Guttering Parts/Fittings as well as Drains and Drop Outlets.

Type of Down Spout Parts/Fittings (20002552)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of Downspout Part or Fitting used as part of a drainage system.

Brick 10005668: Drain Covers (Guttering/Drainage)

Definition

Includes any products that may be described/observed as a covering or grate specifically designed to be placed over a pipe or tube which allows for the complete drainage of any excess water in an area. These products are usually temporary covers and can be removed to allow for unblocking of a pipe.

Includes products such as Metal Drainage Grates and Composite Wooden Drain Covers.

Excludes products such as Drain Pipe Fittings and Lawn Drain Parts/Fittings as well as Plumbing Parts/Fittings, which are directly associated with installation of household products.

Type of Material (20000794)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

Attribute Values

Brick 10003955: Drop Outlets (Guttering/Drainage)

Definition

Includes any products that may be described/observed as a structural unit that is used to divert water further away from a building to prevent damage to the foundations and exterior walls. These products swing up to allow for mowing around their immediate vicinity.

Includes products such as Wood, Galvanized Sheet Metal, Copper, Aluminium and Vinyl products.

Excludes products such as Guttering Parts/Fittings, Down Spout Parts/Fittings and Lawn Drainage Parts/Fittings.

Type of Material (20000794)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of material from which the product is made.

Brick 10002665: Guttering Parts/Fittings

Definition

Includes any products that may be described/observed as a length of piping fixed horizontally to a wall or eaves of a building to carry rainwater away from the exterior where it could potentially cause damage. Guttering parts assist in carrying rainwater towards the downspouts or drains where the water is safely disposed of. These products are available in different sizes and materials and with many different parts can be adapted for use on most building.

Includes products such as Plastic Household Guttering Pipes/Tubes and Ceramic Guttering Bends and Connectors.

Excludes ALL Downspout Pipes and Fittings as well as Lawn Drainage Parts and Fittings and Drop Outlets.

Type of Guttering Parts/Fittings (20002549)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the specific guttering parts or fittings that allow the safe drainage of water.

Brick 10002666:
Guttering/Drainage Other

Definition

Includes any products that may be described/observed as Guttering/Drainage products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Guttering/Drainage products.

Brick 10002664: Guttering/Drainage Variety Packs

Definition

Includes any products than can be described/observed as two or more distinct Guttering or Draining products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Guttering/Drainage class.

Includes products such as Down Spout Parts and Guttering Parts sold together.

Items that are received free with purchases should be removed from the classification decision-making process.

Excludes products such as Guttering and Water Vat variety packs.

Brick 10002663: Lawn Drainage Parts/Fittings

Definition

Includes any products that may be described/observed as a pipes specifically designed to remove excess water from the ground or soil of a defined area. These products collect and channel the water through pipes into a domestic water holder or into the ground water supply.

Includes products such as Wood, Galvanized Sheet Metal, Copper, Aluminium and Vinyl Lawn Pipes as well as Plastic or Composite Underground Drainage Pipes.

Excludes products such as Downspouts Parts/Fittings, Guttering Parts/Fittings and Drop Outlets.

Type of Lawn Drainage Part/Fitting (20002550)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of ground level drainage system part or fitting especially designed for subterranean drainage.

Brick 10002456:
Insulation – Loose Fill/Spray Foam

Definition

Includes any products that may be described/observed as a form of insulation poured or blown into cavities to reduce heat loss. These products when applied correctly can virtually eliminate energy wasting air filtration in lofts.

Excludes products such as rigid foam board.

Brick 10005733:
Insulation – Pipe Lagging/Wrapping

Definition

Includes any products that may be described/observed as a lagging material to wrap one or multiple pipes to reduce heat loss and condensation.

Excludes products such as insulation blankets and cable wrapping used to organise multiple wires and cables.

Brick 10005342:

Insulation – Radiant Barriers/Heat Shields

Definition

Includes any products that may be described/observed as a layer of metal such as aluminium, placed in an airspace to block radiant heat transfer between a heat-radiating surface, for example, a hot roof and a heat-absorbing surface, for example, conventional attic insulation.

Excludes products such as boards.

Brick 10005343: Insulation – Rigid Board (Exterior)

Definition

Includes any products that may be described/observed as a rigid fibre or fibrous board insulation usually consists of fibreglass or mineral wool and is applied to the exterior of the walls before re-siding. It is also used when there's a need for insulation that can withstand high temperatures.

Includes products such as house wrap.

Excludes heat shields and foam boards used inside the home.

Brick 10002455: Insulation – Rigid Foam Board (Interior)

Definition

Includes any products that may be described/observed as a board comprised of foam between fixed layers designed for insulation purposes. These products are lightweight, provide structural support and acoustical insulation.

Includes products such as basement wall insulation boards.

Excludes products such as fibreglass, spray foam, insulation rigid board (exterior) as well as batts/rolls/blankets, gypsum wallboard and radiant heat barriers.

Faced/Unfaced (20002284)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product has a protective coating.

Includes products such as Electrical Gaskets and Electrical Plastic Wire Covers sold together.

Items received free with purchases should be removed from the classification decision-making process.

Excludes products such as Insulation products sold with Roofing products.

Brick 10003927: Beams (Structural)

Definition

Includes any products that may be described/observed as an engineered product created by bonding together individual pieces of lumber having a nominal thickness of 2 inches or less. Individual pieces of lumber are end-joined together to create long lengths referred to as laminations. These laminations are then face-bonded together to create the finished product.

Includes products such as glue laminated floor beams.

Excludes products such as lumber and engineered wood.

Precision End Trim (20002372)

Attribute Definition

Indicate, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product exactly measures the length of the GTIN.

Brick 10005721:

Laths

Definition

Includes any products that may be described/observed as thin flat strips of wood used in building to form a base or groundwork for plaster, tiles or slates.

Excludes products such as concrete bonding agents and cement boards.

Brick 10003932:

Lumber/Wood Panel/Gypsum Other

Definition

Includes any products that may be described/observed as Lumber, Wood Panel or Gypsum products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Lumber/Wood Panel/Gypsum products.

Brick 10003933:

Lumber/Wood Panel/Gypsum Variety Packs

Definition

Includes any product that may be described/observed as two or more distinct lumber/wood panel/gypsum products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the lumber/wood panel/gypsum class.

Includes products such as plywood panels and structural beams sold together.

Items received free with purchases should be removed from the classification decision-making process.

Excludes products such as lumber – softwood sold with millwork ornaments.

Brick 10002538: Plywood/OSB

Definition

Includes any products that may be described/observed as a piece of wood made of two or more layers of veneer joined with glue, and usually laid with the grain of adjoining plies at right angles.

Includes products such as interior and exterior formed plywood.

Excludes products such as gypsum board and softwood board as well as engineered wood panel.

Brick 10005431:

Mouldings/Millwork/Stair Parts Other

Definition

Includes any products that may be described/observed as a moulding, millwork or stairpart product, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified moulding/millwork/stair part products.

Brick 10005432:

Mouldings/Millwork/Stair Parts Variety Packs

Definition

Includes any product that may be described/observed as two or more distinct moulding/millwork or stair part products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the moulding/millwork or stair parts class.

Includes products such as wooden mouldings and stair parts sold together.

Items received free with purchases should be removed from the classification decision-making process.

Excludes products such as lumber – softwood sold with millwork ornaments.

Brick 10002512:

Newel Posts

Definition

Includes any product that may be described/observed as the pillars or posts which support the handrail and are rounded or curved at the top and the bottom of the stairs. These posts are larger than any of the verticals in the handrail and may be very ornate.

Includes products such as plain or ornate newell posts.

Excludes products such as handrails as well as post and pilars and columns used for a different purpose other than as a support for handrails.

Composition of Stair Part/Fitting (20002361)

Brick 10005805: Air Hopper Guns/Sprayers

Definition

Includes any products that can be described/observed as a spray gun and large capacity hopper for applying texture on ceilings and walls. The spray gun is regulated by air pressure and uses gravity fed paints and textured materials.

Includes a variety of air nozzle tips and orifice dial plates that achieve different spray patterns.

Excludes products such as faux painting equipment.

Brick 10005730: Decorative (Faux) Painting Equipment

Definition

Includes any products that may be described/observed as equipment specifically designed to be used for a wide range of decorative painting techniques that achieve a replication of materials such as marble and wood with paint, but also encompasses many other decorative finishes for walls and furniture.

Includes products such as a softening brush, stippling brush and dragging brush as well as faux painting kits.

Excludes products such as regular household paint brushes and rollers.

Type of Decorative (Faux) Painting Equipment (20002633)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify the type of equipment used for decorative (faux) painting techniques.

Brick 10002684: Roll Roofing

Definition

Includes any products that may be described/observed as sheets of material, in roll form, used to waterproof and insulate a flat roof. These products are typically made of asphalt saturated felt or similar materials. These roofing sheets are sold as continuous rolls of a particular size, usually 36 inches wide, and are secured to the roof through the use of tar.

Includes products such as asphalt roll roofing.

Excludes products such as Roofing Shingles/Shakes, Roofing Felts/Fabrics, Roof Coatings, Roofing Membranes and Roofing Tiles/Slates.

Installation Type (20001353)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify how/where the product is installed.

Brick 10002688:

Roof Coatings

Definition

Includes any products that may be described/observed as an additional layer designed to be applied over existing roofing material for purposes of waterproofing and heat reflection. These products are designed to increase the efficiency of existing roofing materials.

Includes products such as White Latex Coating and Asphalt-based Coating.

Excludes products such as Preservers, Paints, Wood Coatings, Fillers and Sealants.

Brick 10002689: Roof/Vent Flashing/Trim Coils

Definition

Includes any products that may be described/observed as sheet metal or other rigid and semi-flexible material pieces fitted to the joint of any roof intersection, penetration or projection in order to prevent water leakage as well as general weather protection. These products may have the additional benefit of acting as a heat barrier and providing extra strength to an intersection as well as also improving the general appearance of a building.

Includes products such as Skylight Flashing and Chimney Flashing.

Excludes products such as Roofing Panels, Roll Roofing, Roofing Membranes, Roof Coatings and Roof Trusses.

Brick 10003974: Roofing – Thatch

Definition

Includes any products that may be described/observed as straw, reeds or similar vegetative materials that are bound together and used as a roof covering. These products are available in various size bundles and often require construction from a skilled Thatcher.

Excludes products such as Roofing Panels, Roofing Tiles/Slates, Roofing Membranes, Roof Trusses and Exterior Trim Veneers.

If Non-Flammable (20002562)

Attribute Definition

Brick 10002687: Roofing Membranes

Definition

Includes any products that may be described/observed as a thin pliable sheet of material applied to roofs, typically for weatherproofing, as well as increasing the insulating properties of the complete roof structure. These products may be made from rubber, asphalt, PVC or similar polymeric material.

Includes products such as PVC Roof Membranes.

Excludes products Roll Roofing, Roofing Tiles, Roofing Panels, Roofing Fabrics/Felts and Roof Trusses.

Brick 10002692:

Roofing Other

Definition

Includes any products that may be described/observed as Roofing/Exterior Trim products, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified Roofing/Exterior Trim products.

Brick 10002686: Roofing Panels/Slabs

Definition

Includes any products that may be described/observed as large rectangles of roofing materials that are fitted together to form a roof. These panels are larger than slates or tiles and when fitted form a rigid enhancement to the existing structure beneath them. These products may be metal, plastic or imitation slate.

Includes products such as rigid metal roofing panels.

Excludes products such as Roofing Tiles, Floor Tiles and Stone veneers as well as Stone Pavers used in the garden.

Type of Material (20000794)

Brick 10002693: Roofing Variety Packs

Definition

Includes any products that may be described/observed as two or more distinct Roofing/Exterior Trim products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Roofing/Exterior Trim class.

Includes products such as Roofing Membranes sold with Roofing Panels.

Items received free with purchases should be removed from the classification decision-making process.

Excludes products such as Roofing Materials sold with Loft Insulation.

Brick 10003205:

Fillers

Definition

Includes any products that may be described/observed as a filler for gaps and holes, which creates an even, uninterrupted surface.

Includes products such as a ready-made paste, or a powder that is mixed before applying to the target surface, or wooden strips used to fill gaps when cabinet-making.

Excludes products such as Plaster, Grout, Sealant and Caulking.

Exterior Trim – Corbels/Pediments

Definition

Includes any products that may be described/observed as a projecting block of stone built into a wall or roof during construction; step-wise construction, as in an arch. Corbels are either used to support other projections above them (such as cornices, window hoods) or for purely ornamental reasons. Pediments are peaked, rounded or other decorative panels above doorways, usually triangular in shape but can be scrolled or segmental.

Includes products such as Gables, Decorative Corbels or Scrolled Pediments.

Excludes products such as Mouldings/Millwork Items, Exterior Trim – Siding, Exterior Trim – Veneers and Roofing Tiles/Slates and Roofing Panels.

Brick 10002677: Exterior Trim – Siding

Definition

Includes any products that may be described/observed as a covering applied to the outside of a building to make it weatherproof as well as improve the aesthetics of the building exterior.

Includes products made from engineered wood, natural wood, aluminium and vinyl, that are assembled together with joiners, couplers and corner beading.

Excludes products such as roofing slates, tiles and shingles.

Type of Material (20000794)

Brick 10002557: Window Balances

Definition

Includes any products that may be described/observed as a regulator for the movement sliding sash windows.

Excludes products such as sash chains / cords, sash tilts.

Brick 10002547: Window Film

Definition

Includes any products that may be described/observed as a film composed of a polyester substrate to which a scratch resistant coating is applied on one side, and a mounting adhesive layer to the other side. These products may be decorative in purpose, or functional, i.e. designed to improve heat retention, protect glass and/or reduce UV rays.

Includes products such as metallized/solar control film, standard film.

Excludes products such as window panes.

Brick 10002543: Window Frames

Definition

Includes any products that may be described/observed as the framework that supports a window. Typically these products are manufactured from wood, metal, UPVC or similar materials.

Excludes products such as complete window units, window panes.

Brick 10002552: Window Handles

Definition

Includes any products that may be described/observed as an appendage to a window designed to be held in order to use or move the window.
Includes products such as knobs, pull-handles, twist-handles, slide-handles, locking handles.

Excludes products such as Casement Operators.

Brick 10002548: Window Locks/Bolts

Definition

Includes any products that may be described/observed as a fastener fitted to a window to keep it firmly closed.

Includes products such as crescent window lock, sash window lock, sliding bolt.

Excludes products such as car window locks, door locks.

Brick 10005298: Window Operators

Definition

Includes any products that may be described/observed as a device specifically designed to assist in opening difficult our of reach windows.

Includes products that can be installed to conventional side hung, top hung and bottom hung casements, skylights and roof windows.

Excludes window handles, hooks and other accessories.

Brick 10005292:

Window Parts/Accessories Other

Definition

Includes any products that may be described/observed as window parts or accessories, where the user of the schema is not able to classify the products in existing bricks within the schema.

Excludes all currently classified window replacement parts or accessories.

Brick 10003944:

Window Parts/Accessories Variety Packs

Definition

Includes any product that may be described/observed as two or more distinct window parts or accessories products sold together, which exist within the schema belonging to different bricks but to the same class, that is two or more products contained within the same pack which cross bricks within the Window Parts/Accessories class.

Includes products such as Window locks sold with Window handles.

Items received free with purchases should be removed from the classification decision-making process.

Excludes window parts and accessories that are sold individually.

Brick 10002550: Window Screens

Definition

Includes any products that may be described/observed as a woven mesh screen to keep insects from entering a building through the open window. These products may be decorated.

Includes products such as metal screens, wooden screens.

Excludes products such as Window Film and Window Frames.

Brick 10003968: Window Shutters

Definition

Includes any products that may be described/observed as a window accessory featuring flat, louvred or corrugated panels that may be singular or paired and are attached to the exterior or interior frame of a window. Depending on design, the shutters provide control of air and light into the building and some products are designed to provide protection from storms and hurricanes.

Includes products made of wood, metal or plastic and the products may be fixed or fold-away.

Excludes products such as exterior trim veneers and exterior trim corbels and pediments.

If Fold-away (20002624)

Attribute Definition

Indicates, with reference to the product branding, labelling or packaging, the descriptive term that is used by the product manufacturer to identify whether the product folds away.
